## **Panasonic**

## 2c 15A, 4c 10A polarized power relays

### SP RELAYS

**RoHS** compliant

Protective construction: Dust cover type

#### **FEATURES**

- 1. Small, slim form factor
  - Facilitating the form factor reduction of devices, the overall height of the relay package is less than half that of our HP relay.
- 2. High sensitivity
  - The high-efficiency polarized electromagnetic mechanism in conjunction with our exclusive spring alignment method achieves levels of sensitivity higher than relays that have been available up to now. For both the 2 Form C and 4 Form C single side stable and 2 coil latching types, the 150 mW minimum operating power level allows direct driving by transistor or chip controllers.
- 3. High reliability and long life
  With a structure that ensures almost perfectly complete twin contact and minimal contact bounce, you get greater reliability than has so far been provided by power relays.

- 4. Latching types also available
  - 1 coil latching and 2 coil latching types are available. In cases where it was formerly unavoidable to use plural relays for large power memory, you can now use a single SP relay.
- 5. Strong resistance to vibration and shock
  - Our balanced armature technology well withstands vibration and shocks. It provides strong resistance to vibration and shock.
- 6. Terminals and mounting boards are available

#### TYPICAL APPLICATIONS

- 1. Electrical power device
- 2. Robots
- 3. Railway signal equipment

#### **ORDERING INFORMATION**
