

## MC1121W ESD Safe Microscope Cover

### Protect your microscope optics from contamination while keeping your work station ESD safe.

A common problem in laboratories is caused when dust and dirt accumulate on a microscope pedestal lens. With Transforming Technologies' MC1221W ESD safe microscope cover you can protect your microscope optics from dust and other contamination while keeping your work station ESD safe.

Common microscope covers are made of vinyl and while they may provide good protection from dust and fumes, it is an insulator and a significant static generator. Charged vinyl covers can become a magnet for contaminants such as dust and transfer these particles to the sensitive microscope optics.

The MC1221W is made from ESD safe materials and does not generate a significant charge. With Transforming Technologies' MC1221W you can protect your microscope optics from contamination while keeping your work station ESD safe.

## Features

- Made From ESD-Safe Materials
- Does Not Generate A Significant Static Charge When Removed
- Compliant for ESD Protected Areas
- Fits Most Common Microscopes

### Specifications:

Material: Polyester with ESD  
Conductive Yarn  
Color: White  
Size: 10.25 x 6.5in

### ESD Properties

Resistance: Less than  $10^6$

### Part Numbers:

MC1221W ESD Microscope Cover

### Applications:

Protect Microscopes in from contaminants. Ideal for industrial, biological, controlled environments and educational applications
