

Anti-Magnetic/Anti-Acid Gold Plated Stainless Steel Tips - High precision bent tips

Replacement gold-plated bent tips for the LCR-Reader and Smart Tweezers ST-5 and ST-5S models. Bent angle reduces fatigue while testing for long periods of time.

Note: The life span of the tips depends on the number of touches and the quality of the surfaces being touched. A rough estimate with a moderate intensity of an LCR-Reader use would be 2-3 years. Worn tips may hinder the results.
