

serial ident.-no.

All dimensions are in mm; tolerances according to ISO 2768 m-H

**Interface**

According to  
Mechanically compatible with

IEC 60169-23  
RPC-2.92 and SMA

**Documents**

Application note

AN001 "Calibration Services"

**Material and plating**

**Connector parts**

Center conductor  
Outer conductor  
Coupling nut

**Material**

CuBe  
Brass  
Stainless steel

**Plating**

Gold, min. 1.27  $\mu\text{m}$ , over chemical nickel  
Gold, min. 1.27  $\mu\text{m}$ , over chemical nickel  
Passivated

**Electrical data**

Insertion loss  $\leq 0.10$  dB at 26.5 GHz

**Mechanical data**

Mating cycles  $\geq 500$   
 Maximum torque 1.70 Nm  
 Recommended torque 0.90 Nm  
 Airline dimensions at 23 °C:  
 - Diameter outer conductor 3.500 mm  $\pm$  0.005 mm  
 - Diameter inner conductor 1.520 mm  $\pm$  0.005 mm  
 - Length outer conductor 15.00 mm + 0.02 mm  
 - Length inner conductor 15.00 mm - 0.02 mm  
 - Length difference  $\leq 0.04$  mm  
 (outer conductor – inner conductor)

**Calculated data (non warranted)**

Lossless characteristic impedance<sup>1</sup> 50  $\Omega$   $\pm$  0.35  $\Omega$   
 Return loss<sup>2</sup>  $\geq 40$  dB, 0.3 GHz to 4 GHz  
 $\geq 38$  dB, 4 GHz to 8 GHz  
 $\geq 35$  dB, 8 GHz to 26.5 GHz

1. The lossless characteristic impedance is calculated from the specified diameters of the inner and outer conductor.
2. The return loss is calculated from the characteristic impedance, the skin depth and the connector interface.

**General standard definitions**

For proper work the vector network analyzer (VNA) used needs a model describing the electrical behaviour of this calibration standard. Depending on the VNA type different models, units and terms are used and have to be entered into the VNA. All values are based on typical geometry and plating.

- Offset  $Z_o$  / Impedance /  $Z_o$  50  $\Omega$   
 - Offset Delay 50.084 ps  
 - Length (electrical) / Offset Length 15.015 mm  
 - Offset Loss 3.00 G $\Omega$ /s  
 - Loss 0.0131 dB/ $\sqrt{\text{GHz}}$

**Environmental data**

Operating temperature range<sup>3</sup> +20 °C to +26 °C  
 Storage temperature range 0 °C to +50 °C  
 RoHS compliant

3. This range is a recommendation. However, the airline can be used in a wider range. Any temperature change from 23 °C results in dimensional changes.

**Declaration of calibration options**

**Factory Calibration**

Standard delivery for this calibration standard includes a Factory Calibration. The Calibration Certificate issued reports individual mechanical calibration results, traceable to national / international standards. Model based standard definitions are reported in an Agilent/Keysight, Rohde & Schwarz and Anritsu compatible VNA format.

**Accredited Calibration**

Not available.

*For further, more detailed information see application note AN001 on the Rosenberger homepage.*

**Calibration interval**

Recommendation 12 months

**Packing**

Standard 1 pce in box  
 Weight 3.7 g/pce  
 Center conductor loose in an acrylic glass tube
