

Smoke Snap-on Case for micro:bit

PRODUCT ID: 4487

This simple Smoke Snap-on Case is both good looking and tough enough to toss into your bookbag or toolbox. It has slim cut-outs for your cable and battery. It's darkened plastic but you can still easily see the LEDs shining through. The bottom section is open so you can plug it into a micro:bit accessory.

This case is great if you want to protect your [micro:bit](#) board from every day usage, but note that it is not waterproof or weatherproof. This enclosure comes as 2 molded plastic halves.

No boards, cables, or accessories are included.
