Product Overview

The PFC FrontEnd is an extremely low profile, 1 RU enclosed chassis mount AC front end that may be used with any Vicor 300 V VI-200/VI-J00 or 375 V Maxi, Mini, Micro modules or ViPAC Arrays to create a complete, high density AC-DC power supply.

Accepting universal input voltages of 85 Vac to 264 Vac, and 100-380 Vdc, the PFC FrontEnd can deliver up to 2,200 W @ 230Vac from 4 non-isolated outputs (additional using "Y" adapters). With an extremely compact, package size of 1.72" H (43,6mm) x 6.4" W (162,6mm) x 7" L (177,8mm), the PFC FrontEnd can provide >28 W/in³.

The PFC FrontEnd is DIN mountable.

Besides meeting the cTÜVus and CE Marked safety agency approvals, the PFC FrontEnd complies with harmonic current limits per EN61000-3-2, electrical fast transient/burst per EN61000-4-4 and surge immunity per EN61000-4-5. It also meets the rugged MIL-STD-810E for vibration.
