

Crimzon RC Bullet®

Turnkey 6-in-1 Universal Remote Control Reference Design Kit

Features

- 6-in-1 Learning and Non-Learning devices for both the European and North American markets.
- Volume punch-through eliminates user mode switching.
- Direct code entry makes selecting manufacturer codesets a snap.
- The ZiLOG universal IR database provides support for a wide range of leading manufacturers' entertainment equipment. Includes codesets reference manual.
- Low-battery indication.
- Complete schematics and bill of materials are included, so all you need is a board layout and case design.

Four Remote Types Ready to Manufacture

ZiLOG's Crimzon RC Bullet® Turnkey Universal Remote Control Kit provides a ready-to-manufacture, universal remote control platform built on the ZLX32300. The Crimzon RC Bullet® kit provides everything needed to start manufacturing your branded universal remote control today. Since more design engineers choose ZiLOG IR components than any other, you know you're getting the support and experience of the industry leader.

Rich Feature Sets

The Crimzon RC Bullet® Turnkey Universal Remote Control Kit features both learning and non-learning models in a six-in-one device (Cable, Satellite, Audio, TV, DVD, VCR) for the North American and European marketplaces. You bring the packaging; we bring the technology to make it work for you.

Convenient Pre-Programmed Features

With the Crimzon RC Bullet® kit there's nothing to program. What you get is a ready-to-manufacture universal remote with preprogrammed database, application codesets and schematic. Key features include built-in volume punchthrough eliminating user mode switching, and direct code entry simplifying manufacturer codesets selection.

Extensive Brand and Model Coverage

The ZiLOG universal IR database provides the best brand and model coverage available. The RC Bullet Kit also includes a codeset reference manual.
