

LA-300 SERIES

Related Information

- General terms and conditions..... P.1
- Sensor selection guideP.11~ / P.833~
- CA2.....P.793~
- General precautions..... P.1027

LED collimated beam type which is as accurate as a laser sensor, but much safer

Safe red LED beam

Since a red LED, harmless to your eyes, has been incorporated as the beam source, you are free from strict laser safety regulations. Moreover, due to the red LED beam source, the measuring spot is visible, which makes positioning of the object simple.

Compact size

Its emitter and receiver are much smaller compared to those of the amplifier built-in type (LA-510). Hence, they can be installed even in a narrow space inside an automatic assembly machine, etc.

Long sensing range type / LA-310

- Emitter:
W20 × H20 × D45 mm
W0.787 × H0.787 × D1.772 in
- Receiver:
W20 × H20 × D35 mm
W0.787 × H0.787 × D1.378 in

Slim type / LA-305

- Emitter:
W18 × H40 × D10 mm
W0.709 × H1.575 × D0.394 in
- Receiver:
W18 × H40 × D10 mm
W0.709 × H1.575 × D0.394 in

FUNCTIONS

Span & shift adjustment

For the analog output, in addition to the span adjustment function, a convenient shift function which enables the analog voltage to be shifted by ±0.5 V has been incorporated.

Example: To shift the analog voltage from 2.51 V to 3.00 V with a certain amount of beam interruption

MOUNTING

Simple beam alignment

Beam alignment is easy by using the target label (accessory). Further, the 3-stage stability indicators on the amplifier indicate the incident beam level at a glance.

APPLICATIONS

Detecting unseated wafers

Two sensors inspect vertical and lateral displacement of wafers.

Inspecting burrs on workpieces

If burrs are present, they increase the width of beam interruption.

Detecting glass bottles

Even clear glass bottles are reliably detected.

ORDER GUIDE

Sensor heads

| Type | Appearance | Sensing range | Sensing width | Minimum sensing object | Model No. (Note) |
|--------------------|------------|---------------------|----------------|-------------------------------------|------------------|
| Long sensing range | | 500 mm 19.685 in | 10 mm 0.394 in | ø0.1 mm ø0.004 in opaque object | LA-310 |
| Slim | | 300 mm 11.811 in | 5 mm 0.197 in | ø0.05 mm ø0.002 in opaque object | LA-305 |

Order for the long sensing range type **LA-310** will be stopped by December, 2007.

Note: The model No. with suffix "P" shown on the label affixed to the product is the emitter, "D" shown on the label is the receiver.
(e.g.) Emitter of **LA-305**: **LA-305P**, Receiver of **LA-305**: **LA-305D**

Amplifiers

| Type | Appearance | Model No. | Output |
|------------|------------|---------------|--|
| NPN output | | LA-A1 | NPN open-collector transistor (Comparative outputs) Analog voltage • Output voltage: 1 to 5 V |
| PNP output | | LA-A1P | PNP open-collector transistor (Comparative outputs) Analog voltage • Output voltage: 1 to 5 V |

Always use the sensor head and the amplifier together as a set.

Accessories

- **MS-LA3-1**
(Sensor head mounting bracket for **LA-310**)
(Note)

Two M3 (length 25 mm 0.984 in) screws with washers are attached.

- **MS-LA3-2**
(Sensor head mounting bracket for **LA-305**)
(Note)

Two M3 (length 15 mm 0.591 in) screws with washers are attached.

Note: 2 sets are required to mount the emitter / receiver.

| Current consumption | 120 mA or less (including sensor heads) | | |
| Comparative outputs (HIGH, LOW) | | NPN open-collector transistor <ul style="list-style-type: none"> Maximum sink current: 100 mA Applied voltage: 30 V DC or less (between comparative output and 0 V) Residual voltage: 1.5 V or less (at 100 mA sink current) 0.5 V or less (at 16 mA sink current) | PNP open-collector transistor <ul style="list-style-type: none"> Maximum source current: 100 mA Applied voltage: 30 V DC or less (between comparative output and +V) Residual voltage: 1.5 V or less (at 100 mA source current) 0.5 V or less (at 16 mA source current) |
| | Utilization category | DC-12 or DC-13 | |
| | Response time | 0.5 ms or less | |
| | Output operation | HIGH output: ON when the received beam level is equal to or lower than HIGH (Over-dark) level LOW output: ON when the received beam level is equal to or higher than LOW (Under-dark) level | |
| | Short-circuit protection | Incorporated | |
| Analog output | | Analog voltage <ul style="list-style-type: none"> Output voltage: 1 V (Darkest) to 5 V (Lightest) Output impedance: 75 Ω | |
| | Slew rate | 8 V/ms or more | |
| | Temperature characteristics | 0.05 % F.S./ $^{\circ}$ C or less | |
| External synchronization | Incorporated (Either gate trigger or edge trigger is selectable) | | |
| Indicators | Power | Green LED (lights up when the power is ON) | |
| | Stable incident beam | Three green LEDs (light up in three stages in proportion to the amount of beam received) | |
| | Operation | Two orange LEDs (light up when High and Low comparative outputs are ON, respectively) | |
| | External synchronization | Green LED (lights up when the comparative outputs are effective) | |
| Adjusters | Span | 15-turn adjuster sets the span for the analog output voltage | |
| | Shift | 15-turn adjuster sets the offset for the analog output voltage | |
| | HIGH (Over-dark) level | 15-turn adjuster sets the HIGH output threshold level (Over-dark level) | |
| | LOW (Under-dark) level | 15-turn adjuster sets the LOW output threshold level (Under-dark level) | |
| Environmental resistance | Pollution degree | 3 (Industrial environment) | |
| | Ambient temperature | 0 to +50 $^{\circ}$ C +32 to +122 $^{\circ}$F (No dew condensation), Storage: -20 to +70 $^{\circ}$ C -4 to +158 $^{\circ}$F | |
| | Ambient humidity | 35 to 85 % RH, Storage: 35 to 85 % RH | |
| | EMC | EN 61000-6-2, EN 61000-6-4 | |
| | Voltage withstandability | 1,000 V AC for one min. between all supply terminals connected together and enclosure | |
| | Insulation resistance | 20 M Ω , or more, with 250 V DC megger between all supply terminals connected together and enclosure | |
| | Vibration resistance | 10 to 150 Hz frequency, 0.75 mm 0.030 in amplitude in X, Y and Z directions for two hours each | |
| | Shock resistance | 500 m/s ² acceleration (50 G approx.) in X, Y and Z directions for three times each | |
| Material | Enclosure: Heat-resistant ABS, Terminal cover: Heat-resistant ABS, Front cover: Polycarbonate | | |
| Cable | 0.22 mm ² (shield wire: 0.15 mm ²) 7-core composite cabtyre cable, 2 m 6.562 ft long | | |
| Cable extension (Note 2) | Extension up to total 50 m 164.042 ft is possible with 0.22 mm ² , or more, cable. (Shield wire must be extended with 0.15 mm ² , or more, shield wire.) | | |
| Weight | Net weight: 200 g approx. | | |
| Accessory | Adjusting screwdriver: 1 pc. | | |

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 $^{\circ}$ C **+68 $^{\circ}$ F**.

2) This product is CE compliant and complies with EMC directives. EN 61000-6-2 is the applicable standard that covers immunities relating to use of this product, but in order to comply with this standard, the following conditions must be satisfied.

Conditions

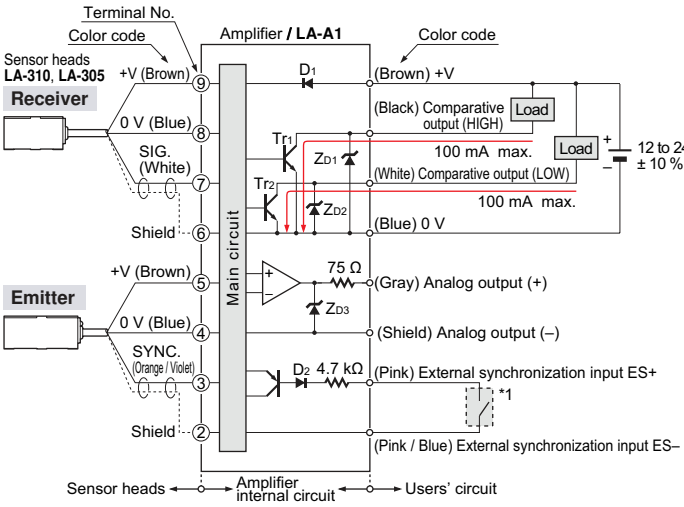

- The amplifier should be connected less than 10 m **32.808 ft** from the power supply.
- The signal line to connect with the amplifier should be less than 30 m **98.425 ft**.

I/O CIRCUIT DIAGRAMS

LA-A1 NPN output type

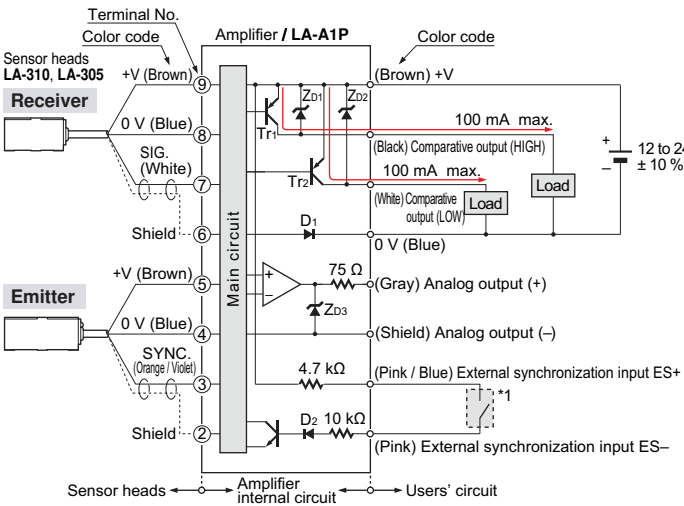

Symbols ... D1: Reverse supply polarity protection diode
 D2: Input protection diode
 ZD1, ZD2, ZD3: Surge absorption zener diode
 Tr1, Tr2: NPN output transistor

- Notes: 1) When ES+ (pink) and ES- (pink / blue) of external synchronization input are connected, both HIGH and LOW comparative outputs are triggered in the mode selected by the external synchronization selection switch. If the external synchronization function is not used, always short-circuit ES+ and ES- and set the external synchronization selection switch to gate trigger.
- 2) To use the analog output (gray), choose a device with an input impedance of 1 MΩ, or more, and connect the shield wire of the analog output to 0 V (common input) of the device.
- 3) Insulate all unused wires individually to avoid miscontact.

LA-A1P PNP output type

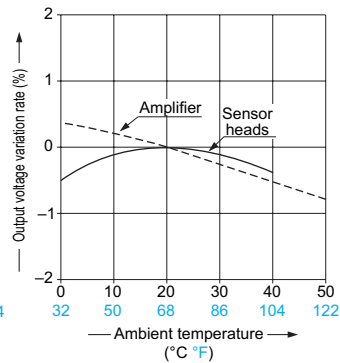

Symbols ... D1: Reverse supply polarity protection diode
 D2: Input protection diode
 ZD1, ZD2, ZD3: Surge absorption zener diode
 Tr1, Tr2: PNP output transistor

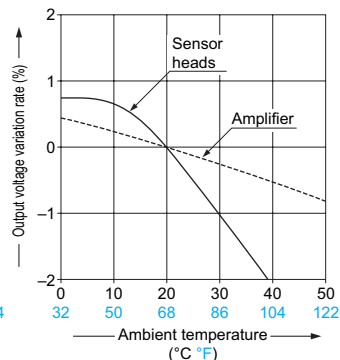

- Notes: 1) When ES+ (pink / blue) and ES- (pink) of external synchronization input are connected, both HIGH and LOW comparative outputs are triggered in the mode selected by the external synchronization selection switch. If the external synchronization function is not used, always short-circuit ES+ and ES- and set the external synchronization selection switch to gate trigger.
- 2) To use the analog output (gray), choose a device with an input impedance of 1 MΩ, or more, and connect the shield wire of the analog output to 0 V (common input) of the device.
- 3) Insulate all unused wires individually to avoid miscontact.

SENSING CHARACTERISTICS (TYPICAL)**LA-310**

Long sensing range type

Correlation between transverse deviation and output voltage**Correlation between interrupted beam width and output voltage****Correlation between ambient temperature and output voltage variation rate****LA-305**

Slim type

Correlation between transverse deviation and output voltage**Correlation between interrupted beam width and output voltage****Correlation between ambient temperature and output voltage variation rate****PRECAUTIONS FOR PROPER USE**

Refer to p.1027 for general precautions.

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Mounting**Amplifier****<Mounting on DIN rail>**

- ① Make sure that the mounting stopper is latched inside. Hook the front side of the controller mounting section on the 35 mm 1.378 in width DIN rail.
 - ② Snap the controller down on the 35 mm 1.378 in width DIN rail.
- *To remove, insert a "minus" screwdriver into the mounting stopper and pull out.

**<Mounting with screws>**

- Use two commercially available M4 screws. The tightening torque should be 1.2 N·m or less.

**Sensor heads**

- The projected LED beam has a directionality. Hence, take care of emitter and receiver mounting direction.

LA-310**LA-305**

- The tightening torque should be 0.5 N·m or less.

LA-310

Sensor head mounting bracket for LA-310 MS-LA3-1 (Accessory)

LA-305

Sensor head mounting bracket for LA-305 MS-LA3-2 (Accessory) (Note)

Note: When carrying out high accuracy sensing with LA-305, install the mounting bracket on the front face as shown in the above figure.

External synchronization

- The external synchronization input controls the timing or the effective duration of the two comparative outputs. Either edge or gate trigger is selectable.

External synchronization input signal: Low ... 0 to 1 V, High ... +V or open

Note: If external synchronization is not used, set the external synchronization selection switch on "Gate trigger" and short-circuit the external synchronization inputs (ES+ and ES-).

Others

- The sensor's output is proportional to the amount of the LED light received. Since there is some variation in the light intensity at the center and the periphery of the sensing area, take care that "output = dimension" may not hold.
- For stable operation, use the sensor 10 min., or more, after switching on the power supply.
- Keep the front faces of the sensor heads free of dust, dirt, metal powder, etc. Should the faces be covered with it, deteriorating its performance, wipe them clean with a soft cloth or blown air.
