LOW-NOISE JFET-INPUT OPERATIONAL AMPLIFIERS
 SLOS080D – SEPTEMBER 1978 – REVISED AUGUST 1996

- Low Power Consumption
- Wide Common-Mode and Differential Voltage Ranges
- Low Input Bias and Offset Currents
- Output Short-Circuit Protection
- Low Total Harmonic Distortion
0.003% Typ

- Low Noise
 $V_n = 18 \text{ nV}/\sqrt{\text{Hz}}$ Typ at $f = 1 \text{ kHz}$
- High Input Impedance . . . JFET Input Stage
- Internal Frequency Compensation
- Latch-Up-Free Operation
- High Slew Rate . . . 13 V/ μs Typ
- Common-Mode Input Voltage Range
Includes V_{CC+}

description

The JFET-input operational amplifiers in the TL07 series are designed as low-noise versions of the TL08 series amplifiers with low input bias and offset currents and fast slew rate. The low harmonic distortion and low noise make the TL07 series ideally suited for high-fidelity and audio preamplifier applications. Each amplifier features JFET inputs (for high input impedance) coupled with bipolar output stages integrated on a single monolithic chip.

The C-suffix devices are characterized for operation from 0°C to 70°C. The I-suffix devices are characterized for operation from -40°C to 85°C. The M-suffix devices are characterized for operation over the full military temperature range of -55°C to 125°C.

[†] The D package is available taped and reeled. Add the suffix R to the device type (e.g., TL071CDR). The PW package is only available left-ended taped and reeled (e.g., TL072CPWLE).

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

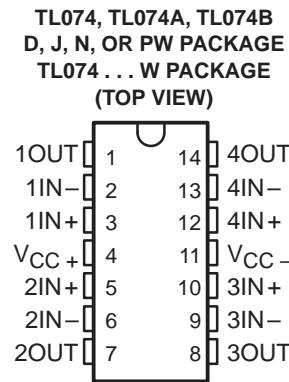

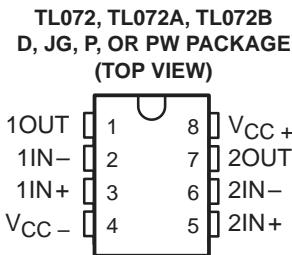

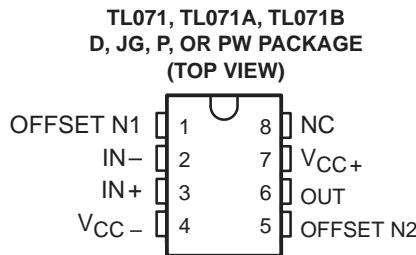

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)[†]

Supply voltage, V_{CC+} (see Note 1)	18 V
Supply voltage, V_{CC-} (see Note 1)	-18 V
Differential input voltage, V_{ID} (see Note 2)	± 30 V
Input voltage, V_I (see Notes 1 and 3)	± 15 V
Duration of output short circuit (see Note 4)	unlimited
Continuous total power dissipation	See Dissipation Rating Table
Operating free-air temperature range, T_A : C suffix	0°C to 70°C
I suffix	-40°C to 85°C
M suffix	-55°C to 125°C
Storage temperature range	-65°C to 150°C
Case temperature for 60 seconds: FK package	260°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds: J, JG, or W package	300°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds: D, N, P, or PW package	260°C

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES: 1. All voltage values, except differential voltages, are with respect to the midpoint between V_{CC+} and V_{CC-} .
 2. Differential voltages are at IN+ with respect to IN-.
 3. The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 V, whichever is less.
 4. The output may be shorted to ground or to either supply. Temperature and/or supply voltages must be limited to ensure that the dissipation rating is not exceeded.

TL072, Dual Low-Noise JFET-Input General-Purpose Operational Amplifier

DEVICE STATUS: ACTIVE

PARAMETER NAME	TL072
V _s (max) (V)	36
V _s (min) (V)	7
I _Q per channel (max) (mA)	2.5
I _Q per channel (typ) (mA)	1.4
GBW (typ) (MHz)	3
Slew Rate (typ) (V/us)	13
V _{IO} (Full Range) (max) (mV)	13
V _{IO} (25 deg C) (max) (mV)	10
I _{IB} (max) (pA)	200
CMRR (min) (dB)	70
V _n at 1kHz (typ) (nV/rtHz)	18
Number of Channels	2
Spec'd at V _s (V)	+/-15
Open Loop Gain (min) (dB)	88
Offset Drift (typ) (uV/C)	18

[FEATURES](#)[Back to Top](#)

- Low Power Consumption
- Wide Common-Mode and Differential Voltage Ranges
- Low Input Bias and Offset Currents
- Output Short-Circuit Protection
- Low Total Harmonic Distortion
- 0.003% Typ
- Low Noise

- V_n = 18 nV/ Hz\ Typ at f = 1 kHz
- High Input Impedance...JFET Input Stage
- Internal Frequency Compensation
- Latch-Up-Free Operation

- High Slew Rate...13 V/us Typ
- Common-Mode Input Voltage Range Includes V_{CC+}

DESCRIPTION[Back to Top](#)

The JFET-input operational amplifiers in the TL07_ series are designed as low-noise versions of the TL08_ series amplifiers with low input bias and offset currents and fast slew rate. The low harmonic distortion and low noise make the TL07_ series ideally suited for high-fidelity and audio preamplifier applications. Each amplifier features JFET inputs (for high input impedance) coupled with bipolar output stages integrated on a single monolithic chip.

The C-suffix devices are characterized for operation from 0°C to 70°C. The I-suffix devices are characterized for operation from -40°C to 85°C. The M-suffix devices are characterized for operation over the full military temperature range of -55°C to 125°C.

The D package is available taped and reeled. Add the suffix R to the device type (e.g., TL071CDR). The PW package is only available lead-ended taped and reeled (e.g., TL072CPWLE).

PARAMETER NAME	TL074
V _s (max) (V)	36
V _s (min) (V)	7
I _Q per channel (max) (mA)	2.5
I _Q per channel (typ) (mA)	1.4
GBW (typ) (MHz)	3
Slew Rate (typ) (V/us)	13
V _{IO} (Full Range) (max) (mV)	13
V _{IO} (25 deg C) (max) (mV)	10
I _{IB} (max) (pA)	200
CMRR (min) (dB)	70
V _n at 1kHz (typ) (nV/rtHz)	18
Number of Channels	4
Spec'd at V _s (V)	+/-15
Open Loop Gain (min) (dB)	88
Offset Drift (typ) (uV/C)	18

FEATURES[Back to Top](#)

- Low Power Consumption
- Wide Common-Mode and Differential Voltage Ranges
- Low Input Bias and Offset Currents
- Output Short-Circuit Protection
- Low Total Harmonic Distortion
- 0.003% Typ
- Low Noise

- V_n = 18 nV/ Hz\ Typ at f = 1 kHz
- High Input Impedance...JFET Input Stage
- Internal Frequency Compensation
- Latch-Up-Free Operation
- High Slew Rate...13 V/us Typ

- Common-Mode Input Voltage Range Includes V_{CC+}

DESCRIPTION[Back to Top](#)

The JFET-input operational amplifiers in the TL07_ series are designed as low-noise versions of the TL08_ series amplifiers with low input bias and offset currents and fast slew rate. The low harmonic distortion and low noise make the TL07_ series ideally suited for high-fidelity and audio preamplifier applications. Each amplifier features JFET inputs (for high input impedance) coupled with bipolar output stages integrated on a single monolithic chip.

The C-suffix devices are characterized for operation from 0°C to 70°C. The I-suffix devices are characterized for operation from -40°C to 85°C. The M-suffix devices are characterized for operation over the full military temperature range of -55°C to 125°C.

The D package is available taped and reeled. Add the suffix R to the device type (e.g., TL071CDR). The PW package is only available left-ended taped and reeled (e.g., TL072CPWLE).

DESCRIPTION**Back to Top**

The JFET-input operational amplifiers in the TL07_ series are designed as low-noise versions of the TL08_ series amplifiers with low input bias and offset currents and fast slew rate. The low harmonic distortion and low noise make the TL07_ series ideally suited for high-fidelity and audio preamplifier applications. Each amplifier features JFET inputs (for high input impedance) coupled with bipolar output stages integrated on a single monolithic chip.

The C-suffix devices are characterized for operation from 0°C to 70°C. The I-suffix devices are characterized for operation from -40°C to 85°C. The M-suffix devices are characterized for operation over the full military temperature range of -55°C to 125°C.

The D package is available taped and reeled. Add the suffix R to the device type (e.g., TL071CDR). The PW package is only available lead-ended taped and reeled (e.g., TL072CPWLE).
