

SUREHOLD®

Adhesives for every application

Plastic Surgery® Super Gel

Specifically formulated to bond plastics more securely than other instant glues or gels.

- Most glue rejects foreign materials; this glue is specifically engineered to "bite" into plastic materials. Bonds more of today's engineered plastics, such as:
 - Acrylic
 - ABS
 - EPDM
 - Nylon
 - Fiberglass
 - Phenolic
 - Plexiglas
 - Polycarbonate
 - Polyester
 - Polystyrene
 - PVC
 - Urethane
- The gel is thicker than glue; use it on projects that call for thicker viscosity.
 - Great for vertical surfaces!
 - Fills gaps
- Bonds in seconds
- Not just for plastics, bonds most surfaces
