

Bluetooth Low Energy(BLE) Module BT600 Series

Ver 1.22, Oct. 2017

BLE Single Mode Module BT600 Series

Specifications:

- Processor: Nordic nRF51822
- Bluetooth: Bluetooth Low Energy
- Frequency: 2.402~2.480 GHz
- Receiver Sensitivity: -91 dBm (typical)
- Transmit Power 0 dBm +/- 1dB
- Interface UART
- Protocol AT Commands
- Applications iOS and Android apps are available
- Operation voltage 1.8V-3.6V
- Line of Sight Range 20m (60 feet) to 50m (150 feet)
- Encryption 128 bit using CCM encryption
- Dimensions 20mmX12mmX2mm
- Operation -25°C to +75°C
- Storage -40°C to +85°C

Applications

- Smart appliances
- Wearable device
- Medical devices
- Health management devices
- Computer peripherals
- Other Bluetooth applications

1. Introduction

BT600 series Bluetooth single mode module uses Nordic nRF51822 Bluetooth Low Energy (BLE) chip. Three antenna options are offered:

- BT600I with a chip antenna on module, line of sight range is 30 meters or 90 feet.
- BT600E, an external antenna is required. Line of sight range is 50 meters or 150 feet when used with recommended antenna.
- EV-BT600. Development board for BT600 modules. A PC or a host processor can communicate with BT600 through an UART port. All IO pins are available at connectors.

A host processor can set BT600 to command and data mode by setting an I/O pin to high and low, respectively. When using with a PC, a jumper is used to set the BT600 IO pin. When in data mode, the host processor communicates with a smartphone, a computer, or other electronic equipment through this BT module.

1.1. Standalone Mode

BT600 can operate in standalone mode – without a host processor. A 32 bit ARM Cortex™ M0 processor with 128 KB of flash memories are built-in. Development tools are available from Nordic and other 3rd parties. BT600 dimensions and pin assignments are the same as some modules from other manufacturers. Programming tools are commercially available to reprogram module for standalone operation.

2. Product Overview

2.1. Nordic nRF51822 Block Diagram

The following is a block diagram of Nordic nRF51822 Bluetooth Low Energy (BLE) IC.

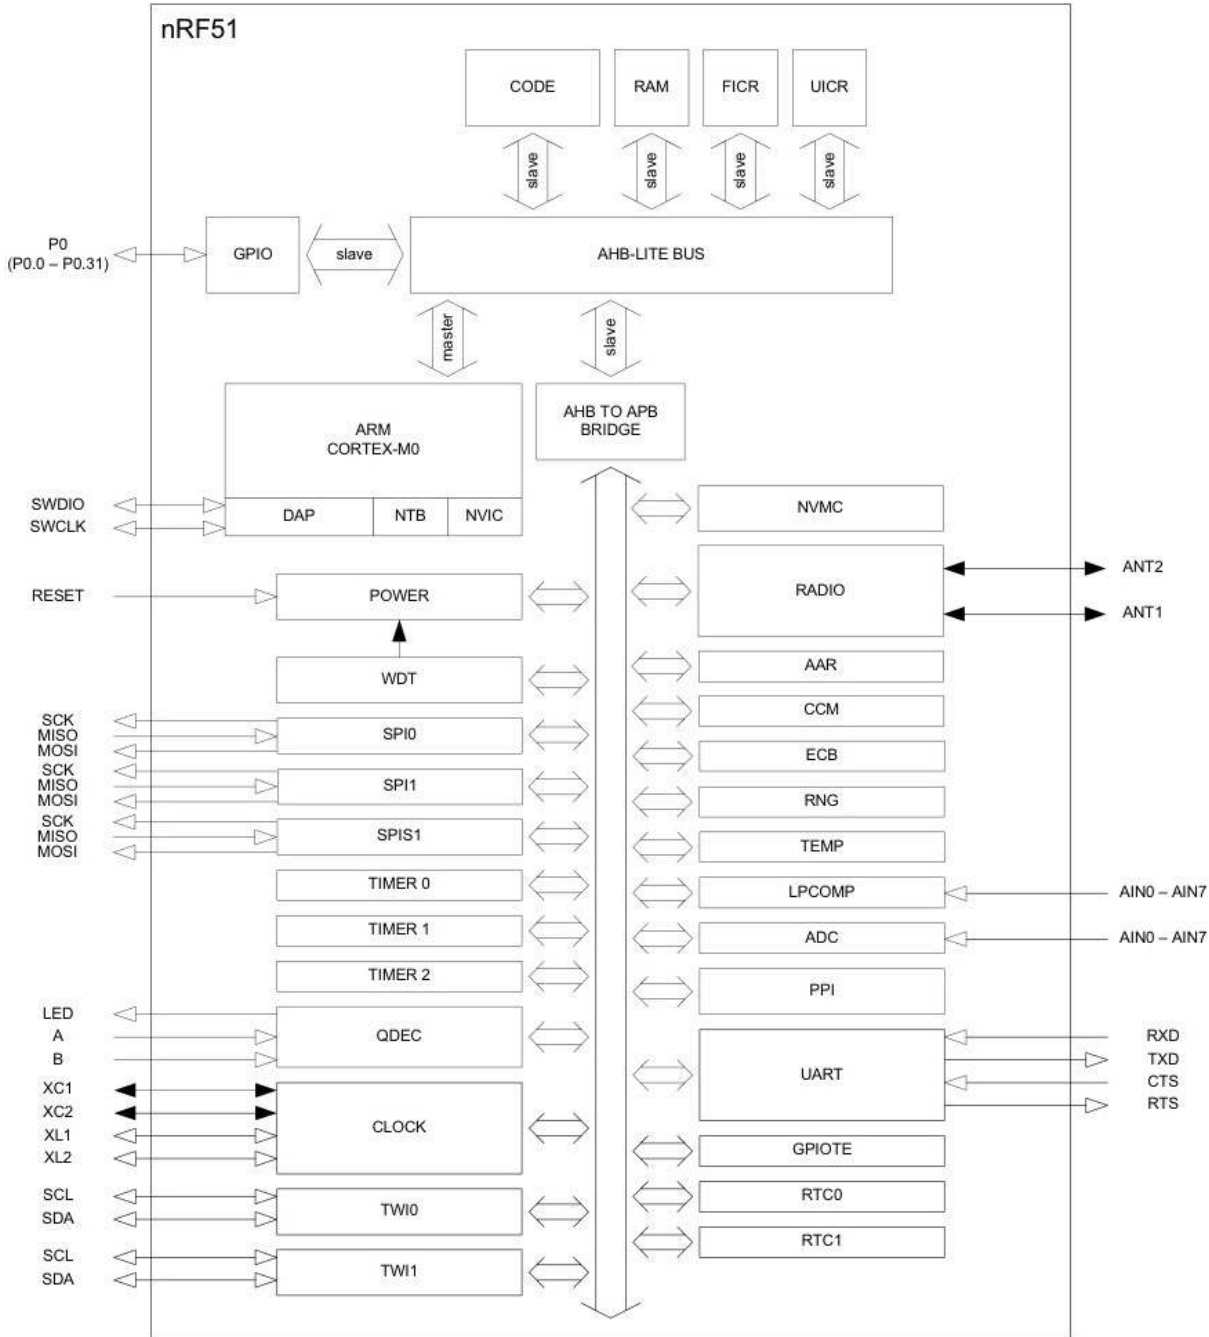

Figure 1 Block diagram of nRF51822

2.2. Photos

The followings are pictures of BT600 module with an EMI shield on and without EMI shield.

2.5. Pin Functions

| Pin | Pin name | Descriptions | Note |
|-----|------------------|---|------|
| 1 | GND | Ground | |
| 2 | P01, AIN2 | General purpose I/O pin, ADC/LPCOMP input 2 | |
| 3 | GND | Ground | |
| 4 | P02, AIN3 | General purpose I/O pin, ADC/LPCOMP input 3 | |
| 5 | P03, AIN4 | General purpose I/O pin, ADC/LPCOMP input 4 | |
| 6 | P04, AIN5 | General purpose I/O pin, ADC/LPCOMP input 5 | |
| 7 | P05, AIN6 | General purpose I/O pin, ADC/LPCOMP input 6 | |
| 8 | P06, AIN7, AREF1 | General purpose I/O pin, ADC/LPCOMP input 7, ADC/LPCOMP reference input 1 | |
| 9 | P07 | General purpose I/O pin | |
| 10 | VCC | DC power input, 1.8V to 3.6V | |
| 11 | GND | Ground | |
| 12 | P08, I2C SDA | General purpose I/O pin, I2C data pin | |
| 13 | P09, I2CSCL | General purpose I/O pin, I2C clock pin | |
| 14 | P10, SPI MOSI | General purpose I/O pin, SPI MOSI pin | |
| 15 | P11, SPI MISO | General purpose I/O pin, SPI MISO pin | |
| 16 | P12, SPI CLK | General purpose I/O pin, SPI clock pin | |
| 17 | GND | Ground | |
| 18 | P13 | General purpose I/O pin | |
| 19 | P14 | General purpose I/O pin | |
| 20 | P15 | General purpose I/O pin | |
| 21 | P16 | General purpose I/O pin | |
| 22 | SWDIO | System reset (active low). Also hardware debug and flash programming I/O. | |
| 23 | SWCLK | Hardware debug and flash programming I/O. | |
| 24 | P17 | General purpose I/O pin | |
| 25 | P18 | General purpose I/O pin | |
| 26 | P19 | General purpose I/O pin | |
| 27 | P20 | General purpose I/O pin | |
| 28 | GND | Ground | |
| 29 | GND | Ground | |
| 30 | RF_ANT | Connection to external antenna | |
| 31 | GND | Ground | |
| 32 | P21, UART TX | General purpose I/O pin, UART TX pin | |

Bluetooth Low Energy(BLE) Module BT600 Series

Ver 1.22, Oct. 2017

| | | | |
|----|----------------|---|---|
| 33 | P22, UART RX | General purpose I/O pin, UART RX pin | |
| 34 | P23, Mode | General purpose I/O pin, 1=command; 0=data | 1 |
| 35 | P24 | General purpose I/O pin, | |
| 36 | P25 | General purpose I/O pin | |
| 37 | GND | Ground | |
| 38 | P26, AIN0, XL2 | General purpose I/O pin, ADC/LPCOMP input 0, Connection for 32.768 kHz crystal | |
| 39 | P27, AIN1, XL1 | General purpose I/O pin, ADC/LPCOMP input 1, Connection for 32.768 kHz crystal | |
| 40 | P28 | General purpose I/O pin | |
| 41 | P29 | General purpose I/O pin | |
| 42 | P30 | General purpose I/O pin | |
| 43 | GND | Ground | |
| 44 | P00, AREF0 | General purpose I/O pin, ADC/LPCOMP reference input 0 | |

1. Connect P23 to high for command mode and to low for data mode.

3. Operation Parameters

| Wireless | Features | Specifications |
|-------------------|----------------------------------|---|
| | Bluetooth | V4.0 -Single Mode |
| | Frequency | 2.402 - 2.480 GHz |
| | Max. Transmit Power | -0.12 dBm |
| | Receiver Sensitivity | -91 dBm, typical |
| | Whisper Mode | Down to -55 dBm, transmit |
| | Link Budget | 95 dB @ 1Mbps |
| | Raw Data Rate | 1 Mbps over the air |
| Host Interfaces | Total | 28 lines, multi function |
| | UART | TX, RX |
| | | Default, 9600, N, 8, 1. |
| | | Baud rate from 1200 to 921600bit |
| | GPIO | Up to 28 lines |
| | SPI | 3 lines |
| | I2C | 2 lines |
| ADC | 6 lines | |
| Control Protocol | | AT Command Sets |
| Encryption | AES Advanced Encryption Standard | 128 bit using CCM encryption |
| Supply voltage | | 1.8V - 3.6V |
| Power Consumption | current | Idle: 3.5 uA |
| Dimensions /尺寸 | 27mmX13mmX2mm | |
| Environmental | Operating | -25°C to +75°C |
| | Storage | -40°C to +85°C |
| BT600P | PCB trace antenna | Line-of-sight range, 20 meters or 60 feet. |
| BT600I | Internal antenna | Line-of-sight range, 30 meters or 90 feet. |
| BT600E | External antenna | Line-of-sight range, 50 meters or 150 feet. |

4. AT Commands

4.1. Brief description of AT commands

- Each command line consists of a prefix, a body and a terminator.
- All command lines begin with the prefix AT (ASCII 065, 084) or at (ASCII 097, 116).
- The body is a string of characters in the ASCII range 032-255. Control characters other than <CR> (carriage return; ASCII 013) and <BS> (back space; ASCII 008) in a command line are ignored.
- The terminator is <CR>.

Bluetooth Low Energy(BLE) Module BT600 Series

Ver 1.22, Oct. 2017

- There is no distinction between upper-case and lower-case characters. A command line can have a maximum length of 80 characters. It is automatically discarded if the input is longer. Corrections are made
- AT command is case-insensitive, following /r/n for end code.
- The default baud rate is 9600 one stop bit and no parity

4.2. Command mode

When P23 (pin 34 of BT600) is pulled high, it is set to AT command mode. In AT command mode, the host processor communicates with the processor on BT600.

| <i>Command</i> | <i>Response</i> | <i>Parameter</i> | <i>example</i> |
|-----------------|---|-----------------------------------|---|
| AT | OK or FAIL | none | AT/r/n OK/r/n |
| AT+RESET | OK or FAIL | none | AT+RESET/r/n OK/r/n |
| AT+VERSION? | +VERSION:<param> OK | Software version number | AT+VERSION?/r/n +VERSION140804 OK/ r/n |

| AT+PIS=<param><param1> | OK or FAIL | P00-P05 1=output, 0=input | AT+PIS=05, 1\r\n OK/r/n |

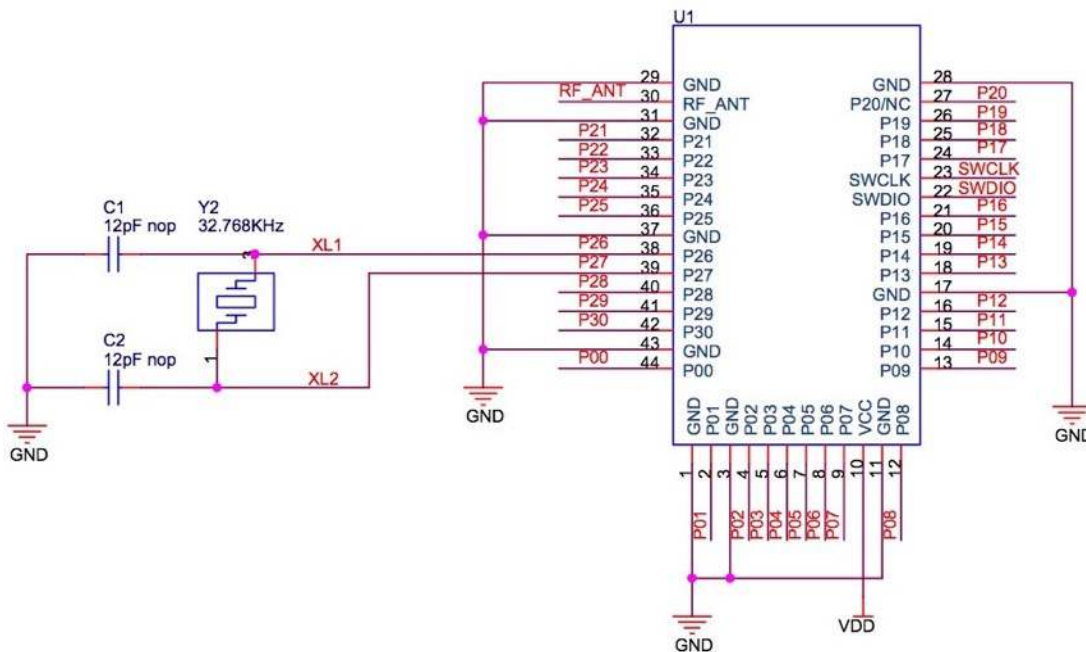

4.3. Data Mode

When P23 (pin 34 of BT600) is pulled low, it is set to data mode. In data model, BT600 provides transparent data transfer between the host processor and a remote device, for example, a smartphone.

5. Reference Applications

5.1. Suggestion for Battery Power Application

Standby current consumption is important for battery-powered product. We suggest adding a 32.768 kHz crystal and 2 capacitors as in the following figure. The 16MHz or 32MHz main clock won't be active at idle state to save power.

6. BT600 Evaluation Board

6.1. Communicating with a PC

A quick and easy way to evaluate BT600 is to use a PC as the host processor. Connect the development board DVB-BT600 to a PC with an USB cable. Then,

- Remove jumper JP1, BT600 is set to command mode. PC will communicate with BT600.
- Install jumper JP1, BT600 is set to data mode. PC will communicate with a remote device through BT600 Bluetooth wireless connection.

Docklight is a testing, analysis and simulation tool for serial communication protocols (RS232, RS485/422 and others). It allows you to monitor the communication between two serial devices or to test the serial communication of a single device. Docklight significantly increases productivity in a broad range of industries, including automation and control, communications, automotive, equipment manufacturers, and embedded / consumer products. Docklight is easy to use and runs on almost any standard PC using Windows 8, Windows 7, Windows Vista or Windows XP operating system.

Docklight software can be downloaded from the following:

http://www.docklight.de/download_en.htm

6.2. Communicating with a Host Processor

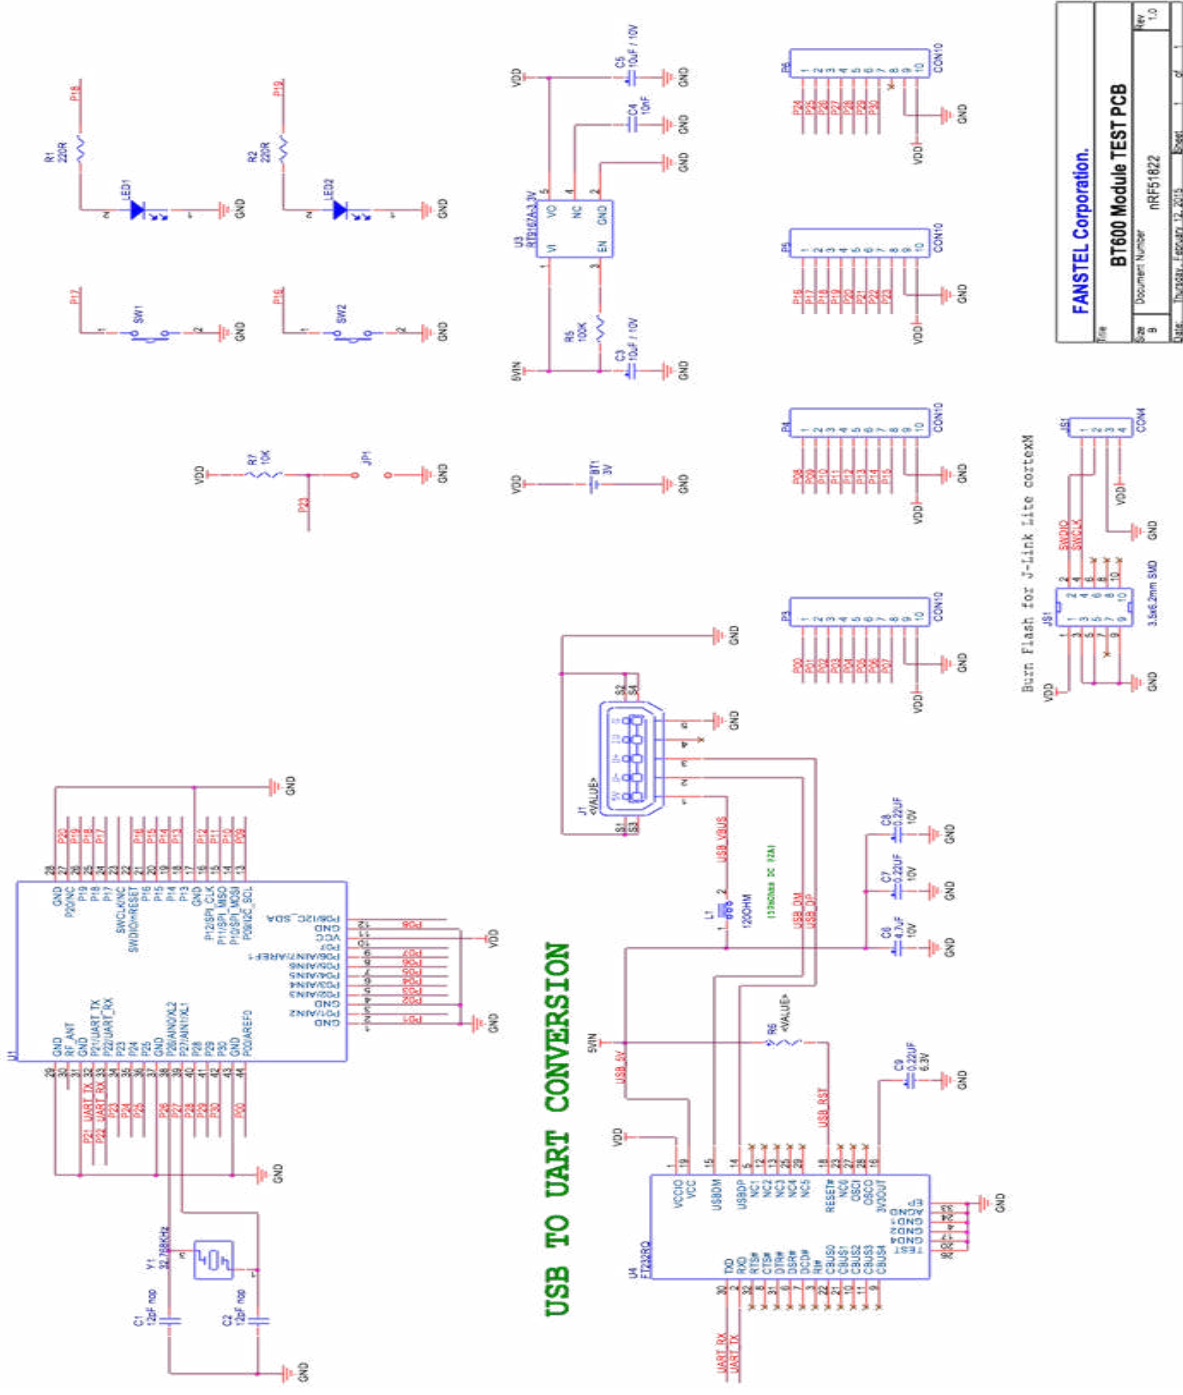

All IO pins of nRF51822 are available at connectors CON1, CON2, CON3, and CON4. To communicate with a host processor, you need to connect:

- RX pin of host processor to P21, TX pin of BT600 UART.
- TX pin of host processor to P22, RX pin of BT600 UART.
- An IO pin to P23 of BT600, set high for command mode and set low for data mode.
- Ground.

7. Miscellaneous

- **DON'T USE A MODULE WITH INTERNAL ANTENNA INSIDE A METAL CASE.**
- **USE A MODULE WITH EXTERNAL ANTENNA INSIDE A METAL CASE. ANTENNA MUST BE OUTSIDE OF A METAL CASE.**
- **FOR PCB LAYOUT:**
 - **AVOID RUNNING ANY SIGNAL LINE BELOW MODULE WHENEVER POSSIBLE,**
 - **NO GROUND PLANE BELOW ANTENNA,**
 - **IF POSSIBLE, CUT-OFF THE PORTION OF MAIN BOARD PCB BELOW ANTENNA.**
- **CONNECT MODULE GROUND TO BATTERY GROUND.**
