

**Spec No.: DS20-2009-0113** Effective Date: 07/05/2009

Revision: -

**LITE-ON DCC** 

**RELEASE** 

BNS-OD-FC001/A4

Property of Lite-On Only

#### **Features**

- \* Lead (Pb) free product RoHS compliant.
- \* High Intensity.
- \* Popular T-1 3/4 diameter Package.
- \* Selected minimun intensities.
- \* General purpose leads.
- \* Reliable and rugged.

### **Package Dimensions**

| Part No.      | Lens              | Source Color |
|---------------|-------------------|--------------|
| LTL-4234-032A | Transparent Green | Green        |

#### Notes:

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is  $\pm 0.25$ mm(.010") unless otherwise noted.
- 3. Protruded resin under flange is 1.0mm(.04") max.
- 4. Lead spacing is measured where the leads emerge from the package.
- 5. Specifications are subject to change without notice.
- 6. The LED lamps original is LTL-4234

### Electrical / Optical Characteristics at TA=25°C

| Parameter                | Symbol           | Min. | Тур. | Max. | Unit    | Test Condition                    |
|--------------------------|------------------|------|------|------|---------|-----------------------------------|
| Luminous Intensity       | Iv               | 40   | 90   | 304  | mcd     | I <sub>F</sub> = 10mA<br>Note 1,4 |
| Viewing Angle            | 2 θ 1/2          |      | 16   |      | deg     | Note 2 (Fig.6)                    |
| Peak Emission Wavelength | λР               |      | 565  |      | nm      | Measurement @Peak (Fig.1)         |
| Dominant Wavelength      | $\lambda$ d      | 566  | 569  | 574  | nm      | Note 3                            |
| Spectral Line Half-Width | Δλ               |      | 30   |      | nm      |                                   |
| Forward Voltage          | $V_{\mathrm{F}}$ |      | 2.1  | 2.6  | V       | I <sub>F</sub> = 20mA             |
| Reverse Current          | $I_R$            |      |      | 100  | $\mu$ A | $V_R = 5V$                        |
| Capacitance              | С                |      | 35   |      | pF      | $V_F = 0$ , $f = 1MHz$            |

Note: 1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE (Commission International De L'Eclairage) eye-response curve.

- 2.  $\theta_{1/2}$  is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
- 3. The dominant wavelength,  $\lambda_d$  is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.
- 4. The Iv guarantee is added  $\pm 15\%$  tolerance.

#### **Features**

- \* Compatible with radial lead automatic insertion equipment.
- \* Most radial lead plastic lead lamps available packaged in tape and reel.
- \* 2.54mm (0.1") straight lead spacing available.
- \* Reel packaging simplifies handling and testing.

### **Package Dimensions**

# **Bin Table Specification**

| Luminous I | ntensity Unit : r | ncd @10mA |
|------------|-------------------|-----------|
| Bin Code   | Min.              | Max.      |
| P3         | 40                | 60        |
| P2         | 60                | 90        |
| P1         | 90                | 135       |
| Q1         | 135               | 203       |
| R1         | 203               | 304       |

Note: Tolerance of each bin limit is  $\pm 15\%$ 

| Dominant V | Vavelength Unit: | nm @10mA |
|------------|------------------|----------|
| Bin Code   | Min.             | Max.     |
| GG1        | 566.0            | 568.0    |
| GG         | 568.0            | 570.0    |
| PG         | 570.0            | 572.0    |
| YG         | 572.0            | 574.0    |

Note: Tolerance of each bin limit is ±1nm

Part No.: LTL-4234-032A Page: 11

Property of Lite-On Only

#### **CAUTIONS**

#### 1. Application

The LEDs described here are intended to be used for ordinary electronic equipment (such as office equipment, communication equipment and household applications). Consult Liteon's Sales in advance for information on applications in which exceptional reliability is required, particularly when the failure or malfunction of the LEDs may directly jeopardize life or health (such as in aviation, transportation, traffic control equipment, medical and life support systems and safety devices).

### 2. Storage

The storage ambient for the LEDs should not exceed 30°C temperature or 70% relative humidity. It is recommended that LEDs out of their original packaging are used within three months. For extended storage out of their original packaging, it is recommended that the LEDs be stored in a sealed container with appropriate desiccant or in desiccators with nitrogen ambient.

#### 3. Cleaning

Use alcohol-based cleaning solvents such as isopropyl alcohol to clean the LEDs if necessary.

#### 4. Lead Forming & Assembly

During lead forming, the leads should be bent at a point at least 3mm from the base of LED lens.

Do not use the base of the lead frame as a fulcrum during forming.

Lead forming must be done before soldering, at normal temperature.

During assembly on PCB, use minimum clinch force possible to avoid excessive mechanical stress.

#### 5. Soldering

When soldering, For Lamp without stopper type and must be leave a minimum of 3mm clearance from the base of the lens to the soldering point.

To avoided the Epoxy climb up on lead frame and was impact to non-soldering problem, Dipping the lens into the solder must be avoided.

Do not apply any external stress to the lead frame during soldering while the LED is at high temperature.

Recommended soldering conditions:

| Solderi                       | ng iron                                      | Wave so   | oldering  |
|-------------------------------|--|---|---|
| Temperature<br>Soldering time | 300°C Max.<br>3 sec. Max.<br>(one time only) | Pre-heat Pre-heat time Solder wave Soldering time | 100°C Max.<br>60 sec. Max.<br>260°C Max.<br>5 sec. Max. |

Note: Excessive soldering temperature and/or time might result in deformation of the LED lens or catastrophic failure of the LED

| Part No.: LTL-4234-032A | Page: | 8 | of | 11 |  |
|-------------------------|-------|---|----|----|--|
|-------------------------|-------|---|----|----|--|

Property of Lite-On Only

#### 6. Drive Method

An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

#### Circuit model A

#### Circuit model B

- (A) Recommended circuit
- (B) The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs

#### 7. ESD (Electrostatic Discharge)

Static Electricity or power surge will damage the LED.

Suggestions to prevent ESD damage:

- Use a conductive wrist band or anti- electrostatic glove when handling these LEDs
- All devices, equipment, and machinery must be properly grounded
- Work tables, storage racks, etc. should be properly grounded
- Use ion blower to neutralize the static charge which might have built up on surface of the LEDs plastic lens as a result of friction between LEDs during storage and handing

Part No.: LTL-4234-032A Page: 9 of 11

#### Property of Lite-On Only

#### Suggested checking list:

#### Training and Certification

- 1. Everyone working in a static-safe area is ESD-certified?
- 2. Training records kept and re-certification dates monitored?

#### Static-Safe Workstation & Work Areas

- 1. Static-safe workstation or work-areas have ESD signs?
- 2. All surfaces and objects at all static-safe workstation and within 1 ft measure less than 100V?
- 3. All ionizer activated, positioned towards the units?
- 4. Each work surface mats grounding is good?

#### Personnel Grounding

- 1. Every person (including visitors) handling ESD sensitive (ESDS) items wear wrist strap, heel strap or conductive shoes with conductive flooring?
- 2. If conductive footwear used, conductive flooring also present where operator stand or walk?
- 3. Garments, hairs or anything closer than 1 ft to ESD items measure less than 100V\*?
- 4. Every wrist strap or heel strap/conductive shoes checked daily and result recorded for all DSL?
- 5. All wrist strap or heel strap checkers calibration up to date?

Note: \*50V for Blue LED.

#### **Device Handling**

- 1. Every ESDS items identified by EIA-471 labels on item or packaging?
- 2. All ESDS items completely inside properly closed static-shielding containers when not at static-safe workstation?
- 3. No static charge generators (e.g. plastics) inside shielding containers with ESDS items?
- 4. All flexible conductive and dissipative package materials inspected before reuse or recycle?

#### Others

- 1. Audit result reported to entity ESD control coordinator?
- 2. Corrective action from previous audits completed?
- 3. Are audit records complete and on file?
