

Compact, ergonomic and cost-effective balancers are streamlined to fit virtually any work space, improve productivity by keeping tools organized and safeguard expensive power tools from possible accidents with superior suspension features

Balancers are devices designed to provide constant cable tension throughout a specified length of cable travel. A true balance condition is achieved through precise power-spring tension control and a unique cable drum design which matches the torque buildup from the power spring. Tools or loads attached to Aero-Motive® Balancers become almost weightless in the hands of operators, allowing maximum freedom to work more efficiently and reduce fatigue throughout work shifts, leading to increased productivity.

Features and Benefits

New and improved power springs	Provides best-in-class ergonomics and life cycles
High-impact ABS housings	Protects spring and drum within light-duty industrial environments
Adjustment spring which can be operated using off-the-shelf general tools	Facilitates easy tension adjustment depending on weight of tool being supported
Nylon coated, durable stranded-steel aircraft cable features adjustable cable stop	Increased durability Allows tools to be set at different positions/ heights
360° rotating swivel hanger, equipped with industrial snap hook secured in place by locking nut	Provides a full range-of-motion Enhances security of balancer and tool Enables quick and easy installation
ABRL Model is equipped with Lock/Unlock ratchets operated by means of an ON/OFF switch	Retraction tension can be locked in place to allow unrestricted tool movements
Units supplied pre-assembled with safety chains	Provides added security
Tools attached using snap hook with locking nut	Increases security of tool and simplifies attachment and removal

Applications

General Industrial

- Manufacturing / assembly facilities
- Workstations
- Portable tools
 - Electric Tools
 - Mechanical Tools
 - Pneumatic Tools
 - Cabling & hoses

Portable Tool Support Applications
