#### **Further Electrical Characteristics**

Switching characteristics and thermal properties are depending strongly on module design and mounting technology and can therefore not be specified for a bare die.

Application example -
-----------------------

#### **Chip Drawing**

- E = Emitter
- $\mathbf{G} = \text{Gate}$
- T = Test pad do not contact

#### **Bare Die Product Specifics**

Test coverage at wafer level cannot cover all application conditions. Therefore it is recommended to test all characteristics which are relevant for the application at package level, including RBSOA and SCSOA.
