## PROFET 2 Click - 7.5A

PID: MIKROE-4819

**PROFET 2 Click** is a compact add-on board that contains a smart high-side power switch. This board features the <u>BTS70082EPAXUMA1</u>, a dual-channel, high-side power switch with embedded protection and diagnosis feature from <u>Infineon Technologies</u>. This switch has a driving capability suitable for 7.5A loads and high inrush current loads and features a ReverSave™, which causes the power transistor to switch on in case of reverse polarity. Besides its protection features, it also has several pin-configurable diagnosis features such as proportional load current sense, open Load in ON and OFF state, and short circuit to ground and battery. This Click board™ is suitable for resistive, inductive, and capacitive loads, replaces electromechanical relays, fuses and discrete circuits, and many more.

PROFET 2 Click is supported by a  $\underline{\mathsf{mikroSDK}}$  compliant library, which includes functions that simplify software development. This  $\underline{\mathsf{Click}}$  board  $\underline{\mathsf{mikroBUS}}^{\mathsf{m}}$  comes as a fully tested product, ready to be used on a system equipped with the  $\underline{\mathsf{mikroBUS}}^{\mathsf{m}}$  socket.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

## **Specifications**

Туре	Power Switch
Applications	Can be used for resistive, inductive, and capacitive loads, replaces electromechanical relays, fuses and discrete circuits, and many more
On-board modules	BTS70082EPAXUMA1 - dual-channel, smart high-side power switch with embedded protection and diagnosis feature from Infineon Technologies
Key Features	High-side switch with diagnosis and embedded protection, reverseON for low power dissipation in reverse polarity, UVLO/OVLO, wide external power supply range with LED indication, and more
Interface	Analog,GPIO
ClickID	No
Compatibility	mikroBUS
Click board size	L (57.15 x 25.4 mm)
Input Voltage	3.3V,External
