

## Flotilla - Weather

PIM031

The Weather module reads temperature and pressure. It's ideal for setting up a mini weather station to monitor conditions in your house or garage.

### Features:

- BMP280 sensor
- Detects temperature and pressure
- Micro USB connector

Find Flotilla Cookbook recipes that use the Weather module at <http://learn.flotil.la/cookbook/> or use Weather with Rockpool at <http://flotil.la/rockpool/>

Or use our Python Flotilla API to control the Weather module.

**Note:** Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
