Product Highlights				

Product Highlights

Quick disconnects allow for quickly connecting or disconnecting a terminal. The front end of the terminal has a female-type receptacle which allows the terminal to slide onto and off of a male blade.

Spades have the open tongue end used for rapid insertion on the mounting screw. The spade is usually used on free standing studs.

Butt Splices allow two stripped wires to be inserted into each end and "butt" in the center, with the crimp securing both wires together.

Features and Benefits	Applications
 Terminals employ the full barrel length that eliminates costly and time consuming location when crimping Finest quality electrolytic copper One-piece design, butted seam The Spade's open tongue end is for rapid insertion on the mounting screw / stud The basic Ring Tongue type is the safest and most reliable because it cannot be disconnected unless the screw is completely removed. Block Spades are designed for use in terminal blocks 	 MRO (Maintenance Repair and Operations) Consumer applications Power applications Motor applications Powertrains Transportation Construction / Mining Energy / Power Production Equipment Instrumentation Environmental Equipment and Controls Blower Motors
