

SMPTE & ARIB HDTV CONNECTION SYSTEM CONNECTORS, CABLES AND MEDIA CONVERTERS

Precision modular connectors to suit your application

Since its creation in Switzerland in 1946 the LEMO Group has been recognized as a global leader of circular Push-Pull connectors and connector solutions. Today LEMO and its affiliated companies, REDEL and COELVER, are active in more than 80 countries with the help of over 40 subsidiaries and distributors.

Over 75000 connectors

The modular design of the LEMO range provides over 75000 connectors from miniature \varnothing 3 mm to \varnothing 50 mm, capable of handling cable diameters up to 30 mm and for up to 114 contacts. This vast portfolio enables you to select the ideal connector configuration to suit almost any specific requirement in most markets, including medical devices, test and measurement instruments, machinery, audio video broadcast, telecommunications and military.

LEMO's Push-Pull Self-Latching Connection System

This self-latching system is renowned worldwide for its easy and quick mating and unmating features. It provides absolute security against vibration, shock or pull on the cable, and facilitates operation in a very limited space.

UL Recognition

LEMO connectors are recognized by the Underwriters Laboratories (UL). The approval of the complete system (LEMO connector, cable and your equipment) will be easier because LEMO connectors are recognized.

CE marking

CE marking  means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives. CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

RoHS

LEMO connector specifications conforms the requirements of the RoHS directive (2011/65/EU) of the European Parliament and the latest amendments. This directive specifies the restrictions of the use of hazardous substances in electrical and electronic equipment marketed in Europe.

Product safety notice & disclaimers

Please read and follow all instructions specified on the last page or on our [website](#) carefully and consult all relevant national and international safety regulations for your application. Improper handling, cable assembly, or wrong use of connectors can result in hazardous situations.

LEMO products and services are provided "as is." LEMO makes no warranties or representations with regard to LEMO product & services or use of them, express, implied or statutory, including for accuracy, completeness, or security.

In no event shall LEMO be liable for any direct, indirect, punitive, incidental, special consequential damages, to property or life, whatsoever arising out of or connected with the use or misuse of LEMO's products.

CAMERA SIDE

LEMO pioneered and set the standard for HDTV

The global standard for HDTV fibre connector

LEMO developed the 3K.93C Series connectors in the early stages of the introduction of HDTV, becoming the standard for high-definition TV.

It is one of the only connectors being used worldwide that complies fully with SMPTE, ARIB and EBU standards for both signal and cable. LEMO's 3K.93C connectors are the standard in national and international broadcast companies.

Fast transition to HDTV

Transition to HDTV is easier than ever with LEMO. The wide range of shell styles and termination procedures, for even non-fibre experts, makes it possible for everyone to be successful in HDTV.

The LEMO 3K.93C connector uses two single-mode fibre contacts, two high voltage contacts, and two signal contacts. Cable drums and cable assemblies with standard lengths are available off the shelf.

Over 20'000 stainless steel shells mating cycles offered

The rugged stainless steel outer shell of the LEMO 3K.93C connectors ensures a very long product life, when properly cleaned. The fibre optic contact can will last many years.

Simple maintenance

The optical contacts are accessible for fast cleaning; an optional simple, lightweight and portable fibre inspection unit helps the user view the condition of the fibre optic contact to ensure reliable operation.

Highest performance with LEMO standard F2 fibre contact

The advantage of using epoxy and polish contacts is the reliability of the termination and longevity of the connector to assure a quality signal transmission.

These contacts are very robust and can withstand wide outdoor temperature variations.

Extend the quality of your connection

LEMO offers quality assembly service for HDTV connection systems. The connector assembly is done in-house by qualified personnel.

F2 fibre optic contacts in various dimensions

LEMO now offers 3 choices of F2 ferrule size to fit your fibre dimensions. Fibres are manufactured to about 125 microns, but in some occasion the fibres might be larger.

LEMO's choice of inner ferrule diameter are fit for 125 µm, 125.5 µm and 126 µm fibres. Designed for use with the LEMO 3K.93C, these contacts can be used directly into any LEMO connector where the F2 contact is used.

Benefits

- Quick disconnect Push-Pull self latching system
- Over 11 shells to meet various application needs
- Stainless steel shell for rugged and harsh environment
- Optional pre-terminated F2 contacts for simple and rapid field assembly
- UL certified connectors
- ARIB (BTA S-1005B), ANSI/SMPTE (304 and 311) and EBU (R100-1999) compatible

3K.93C Series

The LEMO 3K.93C connectors with keys (W) were developed to meet the critical requirements of the new generation of digital HDTV cameras.

The main features of this series are as follows:

- Security of the LEMO Push-Pull self-latching system
- Fitted with the standard LEMO F2 fibre optic contacts.
- Conforms to the Japanese ARIB technical report BTA S-1005B, to the ANSI/SMPTE 304 M-1998 and 311M-1998 standards and to the European EBU Technical Recommendation R100-1999.
- Qualified for use in UL approved equipment such as those specified in UL 1419 «Professional Video and Audio Equipment».
- Cabled connectors have obtained the EC Attestation of conformity No: N8 00 03 39058 001 from the German TÜV Product Service.

The 3K.93C series consists of eleven models which will accept cables specific to this application. It includes the HEAVY DUTY line with stainless steel shells that is guaranteed to at least 20,000 mating cycles and offer more resistance to heavy wear conditions.

Straight plug and free socket

F U W . 3 K . 9 3 C . T L E C 9 6 Z

FUW.3K.93C.TLEC96Z = Straight plug with keys (W), 3K series, hybrid type to accept 2 F2 type fibre optic contacts, 2 power and 2 signal electrical contacts, stainless steel housing, PEEK insulator, female crimp signal contacts, cable fixing type T for 9.2 mm diameter cable, and nut for fitting a bend relief.

Fixed socket

E D W . 3 K . 9 3 C . T L E

EDW.3K.93C.TLE = Fixed socket with rear square flange, keys (W), 3K series, hybrid type to accept 2 F2 type fibre optic contacts, 2 power and 2 signal electrical contacts, stainless steel housing, PEEK insulator, male crimp signal contacts.

Models

FGW Straight plug, cable adapter, for bend relief

Note: The bend relief must be ordered separately (see page 13).

FUW Straight plug, cable collet adapter and long shell for fitting a bend relief with cap

Note: The bend relief must be ordered separately (see page 13).

FXW Fixed plug, round flange (4 holes mounting), without collet

Note: Only available for IP 50 in mated condition.

FMW Fixed plug, round flange (4 holes mounting), cable adapter, for bend relief

Note: Only available for IP 50 in mated condition.
The bend relief must be ordered separately (see page 13).

EDW Fixed socket with rear square flange, (4 holes mounting), and earthing tag

EBW Fixed socket with front square flange, (4 holes mounting)

ENW Fixed socket, nut fixing and earthing tag

PUW Free socket, cable collet adapter and long shell for fitting a bend relief with cap

Note: The bend relief must be ordered separately (see page 13).

PHW Free socket, cable adapter, for bend relief

Note: The bend relief must be ordered separately (see page 13).

PEW Fixed socket, nut fixing, cable adapter, for bend relief (back panel mounting)

Note: The bend relief must be ordered separately (see page 13).

PBW Fixed socket with rear square flange, (4 holes mounting), cable adapter, for bend relief

Note: The bend relief must be ordered separately (see page 13).

Integrated 3U panel with splice tray and connector junctions

An integrated panel with built in splice tray and connector junctions for use where space is limited, either at a wallbox or a patching unit. Up to 3 can be mounted side-by-side to fit in 3U rack dimensions.

Note: Available on request.

2U Rack mounted splice tray with connector junctions

Rack mounted splice tray of 2U height with connector junctions for patch unit. Can accommodate up to 10 LEMO connectors. The modular design of the unit along with blanking plates provides opportunity for increasing numbers of channels up to 10.

Note: Available on request.

Tooling

DCS.F2.N02.PA Fibre Optic one-click cleaner

Insert the one-click cleaner into the insulator and push until an audible "click" is heard. The cleaner uses a mechanical push action to advance an optical grade cleaning tape. More than 500 cleaning per cleaner. Product includes special LEMO F2 ferrule adaptor.

DCT.F2.125.PA Fibre Optic ferrule cleaner

This cleaning tool comes with a bush for different cleaning configurations. More than 500 cleaning per cleaner. This cleaner is for on-site purposes only and should not replace regular maintenance cleaning with cotton buds and alcohol.

DCS.F2.035.PN Alignment device tool

Simple tool with two threaded end for installation/extraction of the F2 contact alignment device. For use with WST.KI.125.34 kit above.

WST.KI.125.34 Cleaning kit F2 contact

Fibre optic cleaning kit of 2 cotton buds, 1 dry and 1 being soaked in IPA (Isopropyl Alcohol) used for cleaning the fibre optic contacts.

WST.FB.CI1.10US2 Video inspection viewer

A portable fibre optic viewer for F2 contact consisting of handset probe, LCD display, ferrule tips for LEMO contacts & software & United States - AC power supply all in a rugged case. European power supply version (WST.FB.CI1.10EU2). An optional USB capture device is also available (part number: WST.FB.CI1.00USB2).

DCS.3K.175.72LN Cable puller

The LEMO cable puller, is a pull through tool that allows passing the cable through narrow sections and protects the optical fibre during installation.

DRV.FO.MOB.LAB3KC Mobile Lab for 3K.93C with F2 fibre optic contact

WST.TE.HDTV HD cable tester

This cable tester provides a quick and easy means of checking the functionality of HD hybrid fibre cables and cable systems. A laser source checks the fibres giving an indication of the attenuation through the whole cable or cable system, and electrical tests check for continuity of both the power and control conductors.

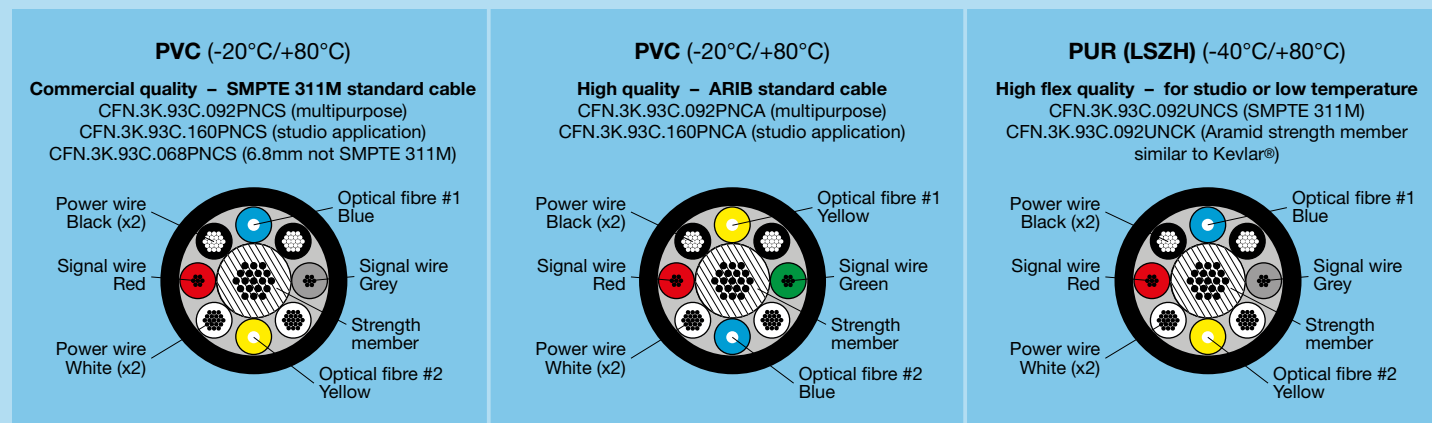

Note: Available on request.

NORTHWIRE™ HDTV cables

NORTHWIRE hybrid camera cable according to SMPTE 311 and ARIB standards

This composite cable combines power conductors for TV camera, control wires, and optical fibres for video and audio transmission in a single cable. Specially designed to cope with the heavy demands of outside broadcast. The cable fully meets the requirements of the SMPTE 311M standard for camera cables. Primary features and benefits of this cable are:

- High durability construction.
- Excellent flexing and twist capability coping with rough handling by rigging crews.
- Superior load bearing capabilities – can be driven over by trucks whilst in operation.
- High tensile strength.

Cable specification

Core type	Power (Aux)	Control (Signal)	Optic fibre	Strength member

MEERKAT™ HD converter

A compact solution for Sony® SD, Grass Valley™ (Thomson®) SD/HD camera based systems

The LEMO MEERKAT™ Triax media converter system provides the solution the broadcast industry has been waiting for. This compact «plug and play» transmission system provides a fibre link between Triax cameras and OB vans. The LEMO Media Converter offers mobile facility providers, production centres and broadcast studios an appropriate and professional solution for long distance signal transmission.

Get more from your cables

The camera is powered via a hybrid cable from the CCU with both the camera signals and the return monitor signals being digitally encoded and transmitted over fibre. The SMPTE 311 hybrid cable uses the well proven technology of the LEMO 3K.93C series. If power from the CCU/OB van is not required, i. e. local power is available, a two fibre cable using 2 x FC-PC or 2 x SC may be used for signal transmission.

Applications

- Golf, skiing, auto racing, olympic games
- Pre-fibred venues
- Stadiums, racing tracks

Advantages

- Plug & play solution
- Lightweight and portable, compact
- No need for bulky / heavy triax cables
- High quality signal transmitted over fibre
- LED functionality display

Features

- CE and FCC class B certified
- Immune to EMI
- NTSC & PAL
- Digital encoding and transmission
- Portable device
- No repeaters needed

Accessories

- Tripod clamps (WST.MT.286.DZZ)
- MEERKAT™ carry belt (WST.MT.170.TZZ)
- 3K.93C assembled cable
- 3K.93C – SC or FC/PC adapter cable
- Option in-line power supply

Every triax-to-fibre Media Converter comes with power supply (110V/220V) adapter and its specific dongle (either Grassvalley™ or Sony®).

Technical characteristics

Input/outputs	Connectors
I/O ports	Triaxial connector 75 Ω ¹⁾
DC in	LEMO 0K series, 2 pin in-line transformer

General	Values
Dimensions	125W x 270L x 50H mm
Mass (approx.)	2 kg
Power requirements ²⁾	100 to 120 Vac, 50/60 Hz
Power requirements ³⁾	220 to 240 Vac, 50/60 Hz
Power consumption	16 W
Operating voltage	12 Vdc / 1.5 A max
Operating temperature	-20°C to +55°C
Humidity	up to +95%
Index protection	IP66 (when mated)

Signals	Values
Optical RX sensitivity	-3 dB to -21 dB
Data rate	2x2.5 GB/s
Optical Tx output	200 μ W (250 μ W max)
Transmission wavelength	1310 nm / 1550 nm

Additional triax cables can be ordered for specific cameras. One set of cable comes with fully working MEERKAT™ System.

Accessories

EDW POWERKAT™

EDW.MT.126.TE3K

It retrieves the power directly from the CCU and allows powering both the camera and HD MEERKAT™ directly from the SMPTE cable. Delivered with 1 meter cable to HD MEERKAT™ (PUW-FUW).

GSF Tripod clamp

GSF.MT.283.DZZ

The tripod clamp allows the camera operator to fix the HD MEERKAT™ to the camera tripod.

WST Hang up strap kit

WST.MT.170.TZZ

The hang up strap kit allows the camera operator to easily hang up the HD MEERKAT™ while shooting. (Strap length: 0.25 m).

WSK Belt carrier

Belt: WSK.MT.285.PN

Buckles: WSK.MT.284.RT

The belt carrier allows the cameraman to carry the MEERKAT™ or the POWERKAT™ on the hip. Simply slide the belt through two buckles.

Note: Two buckles are necessary to carry the MEERKAT™.

MGY Cable lead for battery

MGY.0K.302.YAM020N

Cable lead for professional battery belt, it allows powering the HD MEERKAT™. Cable (length 2 meters) with 2 pin LEMO connector (FGG.0K) to a 4-Pin XLR male Neutrik connector.

To be used with commercialy available battery belts (12V)

FGG Programming dongle

The HD MEERKAT™ is delivered with its original dongle. An additional dongle is available (Grass Valley® / Sony®). The second dongle allows switching from one system to another.

Grass Valley® SD: **FGG.0K.309.CB70TS**

Sony® SD: **FGG.0K.309.CD70SS**

Grass Valley® HD: **FGG.0K.309.CA00TH**

SERBAL™ converter

SERBAL™ - SMPTE Electrical Reconfigurable Bidirectional Alternative Link

The LEMO SERBAL™ is a 4 channel multiplexer that makes HD/SDI to fibre conversion possible. The SERBAL™ provides a compact conversion unit which allows output from up to 4 cameras to be transmitted over a single standard LEMO 3K.93C SMPTE cable.

The optical multiplexers of the SERBAL™ use Wavelength Division Multiplexing (WDM). Each signal within a fibre has a different optical wave length, enabling interference free transmission over longer distance.

The system is available in three versions: it can send 4x HD/SDI signals from the cameras to the OB van using one SMPTE cable. The second version can send 2x HD/SDI signals from the cameras to the OB van, while using the remaining 2 signals for monitor feedback. If only one monitor feedback is required, the third version can send up to 3 camera signals to the OB van.

Applications

- Golf, skiing, auto racing, olympic games
- Pre-fibred venues
- Stadiums, racing tracks

Advantages

- Plug & play solution
- High quality signal transmitted over fibre
- Compact

Features

- Converts from Coaxial BNC input to transmission over standard 3K.93C cable assemblies
- Multiple transmission options available
 - 4 x Tx
 - 2 x Tx + 2 x Rx
 - 3 x Tx + 1 x Rx
- Audio/Data:
 - passes pre-embedded Audio
- Supports all NRZI data formats from 10 Mb/s to 1.5 Gb/s
- Signal format:
 - HD/SDI SMPTE 292M, SDI, DVB-ASI,
 - 19.4 Mb/s SMPTE 310,
 - 142-540 Mb/s SMPTE 259M, SDTI.

Broadcast setup Camera side	SERBAL™ Part number
4 cameras	PHW.MS.3C4.TPBCC
2 cameras / 2 monitors	PHW.MS.3C2.TPBCC
3 cameras / 1 monitor	PHW.MS.3C3.TPBCC

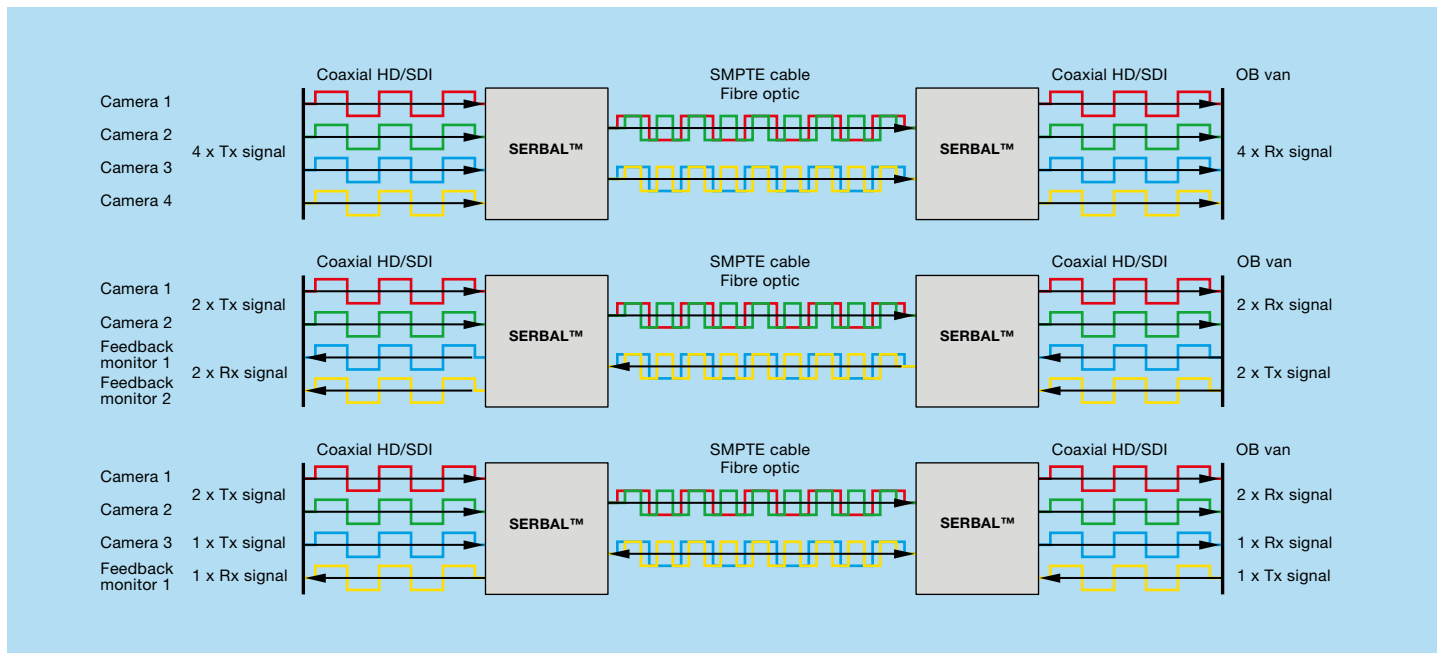

Broadcast setup CCU side	SERBAL™ Part number
4 Rx signals	FGW.MS.3C4.TPBCM
2 Rx signals + 2 Tx signals	FGW.MS.3C2.TPBCM
3 Rx signals + 1 Tx signals	FGW.MS.3C3.TPBCM

Note: Every coax-to-fibre Media Converter comes with power supply (110V/220V) adapter.

Technical characteristics

Characteristics	Values
Weight / dimension	2 kg / 172 x 125 x 50 mm
Transmission wavelength	1310 nm / 1550 nm
Cable (hybrid)	SMPTE 311
Cable (2 fibre 9/125)	2 fibre single mode cable
Fibre type	Single mode
Optical connector	LEMO 3K.93C series
Electrical coax connector	BNC 75Ω
Optical launch power	- 6 dB @ 1310 nm

Characteristics	Values
Optical launch power	- 4.5 dB @ 1550 nm
Optical receive sensitivity	- 30 dB @ 1310 nm
Optical receive sensitivity	- 30 dB @ 1550 nm
Equalisation (camera side)	up to 300 m @ 270 Mb/s
Equalisation (camera side)	up to 100 m @ 1.485 Gb/s
Temperature range	-30°C to +55°C
Humidity range	Up to 95%
Input voltage	12 Vdc @ 1.5 A maximum

SHACK™ converter

SHACK™ - SMPTE conversion device for singlemode fibre (SC, ST, FC or LC)

The SHACK™ is a conversion system from SMPTE connectors/cable to standard singlemode connectors. The system provides a transition from optical communication over hybrid (copper and fibre) cables to optical communication over commonly available singlemode fibre optic cables. The SHACK™ permits the camera to be locally powered while allowing the optical signals to be transmitted.

It is a lightweight and very compact solution for stadiums, sports arenas or outside broadcast applications.

Applications

- Golf, skiing, auto racing, olympic games
- Pre-fibred venues
- Stadiums, racing tracks

Advantages

- Plug & play solution
- High quality signal transmitted over fibre
- Compact
- Uses inexpensive SC, ST, FC or LC connectors
- Camera brand independant

Features

- Converts from SMPTE 304 connectors to standard duplex fibre optic cable assemblies
- Plugs directly into camera/base station

Technical characteristics

Characteristics	Values
Fibre type	Singlemode
Hybrid connector	LEMO 3K.93C series
Singlemode fibre connector	SC, ST, FC, LC
Temperature range	-20°C to +60°C
CCU supply voltage range	15 V to 360 V
EMI/RFI	Complies with 89/336/EEC

Characteristics	Values
Electrical	1)
Laser safety	2)
Humidity range	Up to 95%
Warranty	5 years
Return loss	≤ 45 dB per unit
Average insertion loss	0.4 dB per unit

Note: 1) Complies with EN 61000-6-1, EN61000-6-2. 2) Complies with Class 1 laser product 24 CFR 1040.10 & 1040.11.

MULTISHACK 3X™ or 6X™ converter

The MULTISHACK™ is a conversion system from multiple SMPTE connectors/cable to a single multiway fibre cable. The system provides a transition from HD over hybrid (copper and fibre) cables to HD over a single multiway fibre optic cable.

The MULTISHACK™ enables up to 3 or 6 cameras to be individually powered from one remote source (i.e. a local generator) through the 3K.93C connectors and cables. The optical signals will continue to be transmitted through individual pairs of fibres within a multiway fibre optic cable.

The power is inserted at the Camera end MULTISHACK™ via a waterproof mains / power connector and is distributed to the hybrid cables through individual circuits. The CCU / OB MULTISHACK™ is powered by the output voltage from the CCU.

The MULTISHACK™ uses the technology proven in the SHACK™ and has individual transmission circuits ensuring a manufacturer protection handshake for each channel.

Applications

- Golf, skiing, auto racing, olympic games
- Stadiums, racing tracks
- Wherever multiple cameras are needed in a remote location

Advantages

- Plug & play solution
- One multiway cable is cheaper than multiple SMPTE 311 hybrid cables
- The 6 cameras can be powered without additional mains / DC leads to every camera

Features

- Converts from SMPTE 304 connectors to a single multiway fibre optic cable
- Plugs directly into camera/base station via cable
- Allows connection of up to 6 cameras
- Redundant power supply

MULTISHACK 3X™ conversion system

HD Z-LINK™ fibre optic link system

The HD Z-Link fibre optic camera link system from LEMO provides multi-channel system camera-style video and audio connections, and control for studio cameras and camcorders alike over a single hybrid cable using LEMO 3K.93C connectors.

The use of high bandwidth fibre optics and the multiplexing of numerous forward and return video, audio, talkback and data channels provides full communication with any camera position.

The HD Z-Link is compatible with a wide ranges of cameras from top end digital cinematography cameras, broadcast system cameras and camcorders, professional cameras and camcorders and top end consumer cameras from Sony, Thomson, Hitachi, Ikegami, and Panasonic, to name a few, to low cost handheld camcorders.

The dual 1.5Gb/s HD SDI option allows support of stereoscopic (3D) implementations of the Red One® (and other cameras). The HD Z-Link is able to carry 3Gb/s HD SDI which gives it a competitive advantage over the 2.5Gb/s products that do not support 1080P.

The base unit incorporates a menu-driven front panel control for ease of configuration of your camera system. The system offers automatic Genlock/synchroniser management facilities. Additional features include full audio with 8 digital stereo channels and intercom systems.

An extensive range of connectors is provided to enable connection of most camera types and ethernet connectivity is also provided. A clip-on in-line power supply option is also available providing up to 120W.

HD Z-Link with all options	Basic HD Z-Link	Description
●	○	3G 1080P 50Hz or 59.94Hz programme video
●	●	HD 1.5Gb/s programme video
●	○	Dual HD channel programme video for stereoscopic (3D)
●	○	Dual link HD to 3G conversion (Level B)
●	○	3G 1080P return video
●	●	Analogue video
●	●	Basic camera reference connection
●	○	Gearsync (Automatic Genlock/Synchroniser management)
●	●	8 stereo digital audio channels + 1 stereo analogue audio channel
●	●	Two-channel intercom
●	●	Multisystem intercom
●	●	Front panel menu-driven control unit
●	●	Test pattern generator
●	○	HD to SD monitoring down converter
●	●	Ethernet port
●	●	Compatible with all SD cameras
●	● 1)	Compatible with all HD cameras
●	●	9V supply for Camcorders
●	●	Hybrid power option (120W)

Note: 1) not 3G 1080P.

Note

Note

Note

Product safety notice

PLEASE READ AND FOLLOW ALL INSTRUCTIONS CAREFULLY AND CONSULT ALL RELEVANT NATIONAL AND INTERNATIONAL SAFETY REGULATIONS FOR YOUR APPLICATION. IMPROPER HANDLING, CABLE ASSEMBLY, OR WRONG USE OF CONNECTORS CAN RESULT IN HAZARDOUS SITUATIONS.

1. SHOCK AND FIRE HAZARD

Incorrect wiring, the use of damaged components, presence of foreign objects (such as metal debris), and / or residue (such as cleaning fluids), can result in short circuits, overheating, and / or risk of electric shock. Mated components should never be disconnected while live as this may result in an exposed electric arc and local overheating, resulting in possible damage to components.

2. HANDLING

Connectors and their components should be visually inspected for damage prior to installation and assembly. Suspect components should be rejected or returned to the factory for verification. Connector assembly and installation should only be carried out by properly trained personnel. Proper tools must be used during installation and / or assembly in order to obtain safe and reliable performance.

3. USE

Connectors with exposed contacts should never be live (or on the current supply side of a circuit). Under general conditions voltages above 30 VAC and 42 VDC are considered hazardous and proper measures should be taken to eliminate all risk of transmission of such voltages to any exposed metal part of the connector.

4. TEST AND OPERATING VOLTAGES

The maximum admissible operating voltage depends upon the national or international standards in force for the application in question. Air and creepage distances impact the operating voltage; reference values are indicated in the catalog however these may be influenced by PC board design and / or wiring harnesses. The test voltage indicated in the catalog is 75% of the mean breakdown voltage; the test is applied at 500 V/s and the test duration is 1 minute.

5. CE MARKING

CE marking  means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives.

CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

6. PRODUCT IMPROVEMENTS

The LEMO Group reserves the right to modify and improve to our products or specifications without providing prior notification.

7. **WARNING (Prop 65 State of California)**

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. LEMO products are exempt from proposition 65 warnings because they are manufactured, marketed, and sold solely for commercial and industrial use. For further information, please visit <https://www.lemo.com/quality/LEMO-Prop-65-compliance-declaration.pdf>.

Disclaimers

LEMO works constantly to improve the quality of its products; the information and illustrations figuring in this document may therefore vary and are not binding. In any case, LEMO makes no specific warranty of merchantability, fitness for a particular purpose, third party components as such or included in assembly, non-infringement, title, accuracy, completeness, or security. The user is fully responsible for his products and applications using LEMO component.

In no event shall LEMO, its affiliates, officers, agents or employees be liable for any incidental, indirect, special or consequential damages in connection with the products or services provided by LEMO, including (without limitation) loss of profits or revenues, interruption of business, loss of use of the products or any associated equipment, materials, components or products, damages to associated equipment or in combination with other components, materials.

Reproduction of significant portions of LEMO information in LEMO data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices.
