## SPECIFICATIONS

### Contacts

Arrangement			2 Form C, 4 Form C	
Initial contact resis	stance	Max.	50 mΩ	
(By voltage drop 6	V DC 1 A)	Typical	25 mΩ	
Contact material	Movable contact		Gold-clad silver	
Contact material	Stationary co	ontact	Gold-clad silver	
D. //	Max. switchi	ng power	60 W 100 VA	
Rating, (resistive load)	Max. switchin	ng voltage	220 V AC, DC	
(103131170 1040)	Max. switchin	ng current	50 mΩ           25 mΩ           Gold-clad silver           Gold-clad silver           60 W 100 VA           220 V AC, DC           2 A           10 <sup>8</sup> 2 × 10 <sup>5</sup> 10 <sup>6</sup>	
	Mechanical		10 <sup>8</sup>	
Expected life (min. operations)	Electrical (Resistive)	2 A 30 V DC	2 × 10 <sup>5</sup>	
		1 A 30 V DC	106	
		0.5 A 30 V DC	107	

### Coil

Nominal operating power, at 25°C	2C	Approx. 300 mW	
Nominal operating power, at 25 C	4C	Approx. 480 mW	
Max. operating power for continuous	duty	Approx. 1 W at 40°C 104°F	

#### Remarks

\* Specif cations will vary with foreign standards certif cation ratings.
\*1 Measurement at same location as "Initial breakdown voltage" section

\*<sup>2</sup> Detection current: 10 mA \*<sup>3</sup> Excluding contact bounce time

- \*4 Half-wave pulse of sine wave: 11ms; detection time: 10µs \*5 Half-wave pulse of sine wave: 6ms

\*6 Detection time: 10µs

\*7 Refer to 5. Conditions for operation, transport and storage mentioned in AMBIENT ENVIRONMENT in catalog.

### **TYPICAL APPLICATIONS**

NF relays are widely acceptable in applications where small size and high sensitivity are required.

Such applications include: Electronic equipment, Household applications,

Alarm systems, Off ce machines, Communication equipment, Measuring equipment, Remote control systems, General control circuits, Machine tools, Industrial machinery, etc.

## **ORDERING INFORMATION**

		Ex. NF 4 E	B (	48V 1	
Con	itact arrangement	Type classification	-	Coil voltage (DC)	Contact material
	2: 2 Form C <sup>~</sup> 4: 4 Form C	EB: Standard	-	5, 6, 12, 24, 48 V	Nil: Gold-clad silver 1: Gold-cap over silver palladium

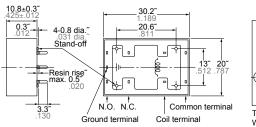

(Notes) 1. For VDE recognized types, add suffix VDE.
2. For UL/CSA recognized type, add suffix-A, as NF2EB-12V-A whose ground terminal is cut off."
3. Standard packing Carton: 20 pcs.; Case: 200 pcs.

mm inch

NF

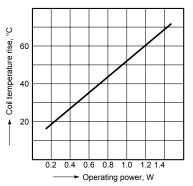

# **REFERENCE DATA**

#### 1. Life curve

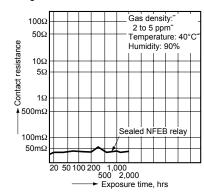

NF

2. Coil temperature rise (resistance method)

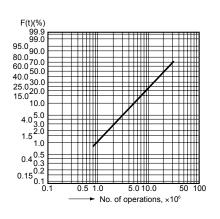

#### 3. H<sub>2</sub>S gas test

### 4. Contact reliability

Test conditions:

- 1. Contact current/voltage: 10 µA 100 mV 1 kHz
- 2. Cycle rate 20 cps.
- 3. Miscontact detection level: 1 mW (= 100  $\Omega$ ) 4. Detection method: Observation of all changeover contacts

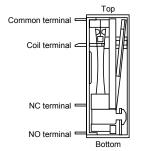

Test result: m = 1.5

 $\mu = 21.2 \times 10^{6}$ 95% conf dence level = 3.1 × 10<sup>6</sup> 17 contacts out of 20 achieved 10 million no miscontact operations.

### NOTES

1. Prevention of vibration and shock

To reduce the likelihood of vibration and shock, we recommend that you install so that the contact action is not in the direction of gravity.

For Cautions for Use, see Relay Technical Information in catalog.

5. High temperature test Test conditions:

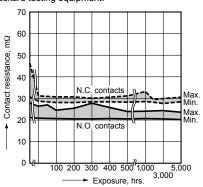

Ambient temperature: 80°C ±2°C

Test method:

1. All contacts were switched for 100 operations on 2 A 30 V DC resistive load. 2. Samples then were exposed to 80°C temperature

for 5,000 hours, continuous 3. Contact resistance was measured with Hewlett-

Packard testing equipment.

Test result:

Amber relays showed a stable spread of contact resistance within the initially specified 50 m  $\Omega$  after 5,000 hours exposure.
