

Flotilla - Rainbow

PIM026

The Rainbow module has five shiny bright full-colour LEDs. It's ideal for using as a readout of sensor values, mood light, or health bar indicator for a game.

Features:

- Five 5050 RGB LEDs
- SN3218 driver chip
- Micro USB connector

Find Flotilla Cookbook recipes that use the Rainbow module at <http://learn.flotil.la/cookbook/> or use Rainbow with Rockpool at <http://flotil.la/rockpool/>

Or use our Python Flotilla API to control the Rainbow module.

Note: Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
