DESCRIPTION

PUCK-PRO Low Voltage Series is an ideal solution for commercial and residential applications requiring superior quality and visual aesthetics. This Ultra Slim light produces about 170Lm and is ideal where a very slim fixture is required in cabinets, closets, displays, commercial windows, jewelry stores, museums and a variety of residential and commercial applications. It comes in Silver, Black, White and Satin Nickel finishes and requires an AC/DC adaptor/power supply (sold separately). Multiple lights can be connected to one power supply and regulated by one wall switch or dimmer. This product is ETL certified.
