Two-Way Radio Antenna

Today's work and lifestyles require us to communicate anytime, anywhere whether on the move or sitting still. Bluetooth and 802.11 standards make wireless connections to computer networks and other devices possible, while at the same time enabling freedom of movement.

Laird Connectivity's practical and rugged external wireless device antennas are designed to fit into the portable devices used in office, industrial and home environments. The antennas feature flexible elements and many are $\frac{1}{2}$ wave coaxial dipole design for reduced ground dependence and improved performance.

FEATURES AND BENEFITS

- Injection-molded ¼ wave flexible cable antenna
- · High durability, high efficiency
- Textured finish with strain-relief base

- Available in various standard connectors
- · An original Tuf Duck antenna

APPLICATIONS

• For Bluetooth and IEEE 802.11b/g devices
