

Designed with a nut on the base of the handle and a short head with a heavy duty weld, this 12" F Connector Tool is perfect for installing or removing rusted or corroded F connectors in high-density locations. This tool also features the following:

- Head is welded using premium materials to withstand high amounts of force and torque
- Short head design allows it to grasp connectors in high density locations where cables may be twisted or bent
- Nut at the base of the shaft allows it to be torqued with a wrench to remove heavily corroded or rusted F connectors
- 12" overall length allows you to reach F connectors in hard-to-reach places
- Ergonomically designed handle provides increased comfort and leverage
