Warning: DO NOT USE IN LIFE SUPPORT

LIFE SUPPORT POLICY

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

As used herein

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.

Overview

Zilog's Passive Infrared (PIR) sensors are designed to deliver high performance and excellent EMI immunity for the most demanding motion detection applications.

The ZSBG323611PP PIR sensor is used in combination with a PIR lens and consists of two sensing elements behind a spectral filter window tuned to 8-13um wavelength to help block out unwanted IR energy sources.

The ZSBG323611PP is a polarity matched device. The output signal polarity is consistent for all devices making it ideal for applications using multiple sensors or requiring zone detection.

Features

- Dual-element, polarity-matched, balanced differential (series opposed) PIR sensor
- High PSRR
- Built in EMI compensation
- Elements are 1.0mm x 2.3mm spaced 1.0mm apart
- Standard metal TO-5 package
- Recommended operating voltage range of 1V to 15V
- Operating temperature range of -40°C to +70°C

Applications

- Dual PIR intrusion motion detectors
- Multi-PIR zone and proximity detection
- Battery powered applications

Ordering Information

Part Number	Description
ZSBG323611PP	Dual-Element, Polarity Matched Pyroelectric Sensor

Electrical Characteristics

- | | |
|----------------------------|---|
| 1) Signal output: | Min. 2.6 V _{P-P} (Typ. 4.0 V _{P-P}) |
| 2) Noise output: | Max. 250 mV _{P-P} (Typ. 90 mV _{P-P}) |
| 3) Balance output: | Max. 10%
$Bo = [SA-SB / SA+SB] \times 100$
Bo: Balance output
SA: Absolute signal output on Element A
SB: Absolute signal output on Element B |
| 4) Source voltage: | 0.3 V to 1.4 V (Vd: 5V, Rs: 47K ohm) |
| 5) Operating voltage (Vd): | 1 V to 15 V (Rs: 47K ohm) |

Notes:

Test set-up block diagram see Figure 1 and Figure 2.
Test circuit configuration see Figure 3.
Items 1,2 ,3 and 4 are 100% tested.

Optical Characteristics

- | | |
|---------------------------|--|
| 1) Typical field of view: | 134 degrees from center of element on axis X
120 degrees from center of element on axis Y
(See Figure 4) |
| 2) Filter substrate: | Silicon |
| 3) Cut on (5%T ABS): | 5.0 ±1.0 micron |
| 4) Transmissivity: | ≥70% average 8 to 13 micron |

Environmental Characteristics

- | | |
|---------------------------|--------------------------|
| 1) Operating temperature: | -40°C to +70°C |
| 2) Storage temperature: | -40°C to +80°C |
| 3) Operating humidity: | 95% RH or less (at 30°C) |
| 4) Storage humidity: | 95% RH or less (at 30°C) |

RoHS Compliance

This product conforms to the RoHS Directive in force at the date of issuance of this Product Specification.

Test Conditions

The figures below show the configuration under which the PIR sensor electrical characteristics are tested.

Figure 1 - Test Set-up Configuration

Figure 2 - Occluder Position

Figure 3 - Test Circuit Configuration

Measurement Amp. Characteristics:

Type: Non-inverting; Gain: 72.5 dB at 1 Hz; Bandwidth: 0.4 to 2.7 Hz / -3 dB

Field of View

The typical field of view of the ZSBG323611PP PIR sensor is shown in Figure 4.

Figure 4 - Field of View

PIR Sensor Circuit Diagram

The ZSBG323611PP circuit diagram is shown in Figure 5.

Figure 5 - Circuit Diagram

Mechanical Dimensions

The dimensions of the ZSBG323611PP PIR sensor is shown in the following figures. All dimensions are $\pm 0.2\text{mm}$ unless otherwise stated.

Figure 6 - Top View

Figure 7 - Bottom View

Figure 8 - Side View

Device Markings

Lot number information is marked on the top surface of the PIR sensor.

Figure 9 - Device Markings

Packaging

The ZSBG323611PP PIR sensor is shipped in sheets of 200 pieces, packed in boxes as shown in Figure 10 through Figure 12. The sheets are packed in an inner-box (2 sheets/box = 400 pieces) and 15 inner-boxes are packed in an outer-box for a total of 6,000 pieces per box.

Sheet and Inner-Box Packaging

- 1) Standard sheet quantity: 200 pieces
- 2) Standard inner-box quantity: 2 Sheets (400 pieces)

Figure 10 – Sheet & Inner-Box Packaging

3) Standard Box Quantity: 6,000 pieces (15 Inner-Boxes)

Figure 11 – Outer-Box Packaging

4) The Standard Outer-Box dimensions are shown in Figure 12

Usage Restrictions and Precautions

This section presents restrictions and precautions that apply to Zilog pyroelectric sensors.

Design Restrictions and Precautions

This sensor is designed for indoor purposes in which secondary accidents due to operation failure or malfunctions can be anticipated; therefore, add appropriate fail-safe functionality to your design. If these sensors are intended for outdoor applications, be sure to apply suitable supplementary optical filters and use a waterproof enclosure.

Usage Restrictions and Precautions

To prevent sensor malfunctions, operational failure, or any deterioration of their characteristics, do not operate these PIR sensors under the following, or similar, conditions:

- Rapid environmental temperature changes
- Strong shocks or vibrations
- In places where there are obstructing materials (glass, fog, etc.) through which infrared rays cannot pass within the detection area
- In fluids, corrosive gases, and sea breezes
- Under continual high-humidity atmospheric conditions
- Exposed to direct sunlight or automobile headlights
- Exposed to directly to forced-air currents from a heater or air conditioner

Handling and Storage Restrictions and Precautions

To prevent sensor malfunctions, operational failure, appearance damage, or any deterioration of their characteristics, do not expose these sensors to the following, or similar, handling and storage conditions:

- Vibrations over extended periods
- Strong shocks
- Static electricity or strong electromagnetic waves
- High temperature and humidity over extended periods
- Corrosive gases or sea breezes
- Dirty and dusty environments that may contaminate the optical window

Assembly Restrictions and Precautions

Soldering:

- Use soldering irons when soldering
- Avoid extended durations of heat on the sensors' pins, because excessive heat may cause deterioration of the sensor (e.g., durations beyond 5 seconds at 350°C)

Washing:

- Be sure to wash out all flux after soldering. Residual soldering materials may cause malfunctions.
- Use a brush when washing; washing with an ultrasonic cleaner may cause operational failure
