

# CL8800 230VAC LED Driver Evaluation Board

Part Number: ADM00866

# Summary

The CL8800 230VAC LED Driver Evaluation Board is a complete solution consisting of an LED Driver (ADM00866) and an LED Load Board (ADM00861) powered directly from the 230VAC line and based on Microchip Technology's CL8800 Sequential Linear Driver.

## Package Contents

1 x CL8800 230VAC LED Driver Evaluation Board

# Product Features

The CL8800 LED Driver Evaluation Board (ADM00866) has the following features:

- \* Input Voltage: 230 Vrms +/-15%, 50/60 Hz
- \* Typical Output Capability: up to 130mA
- \* Efficiency: Over 85%
- \* Max Output Power: 8.5W (depends on the cooling provided)
