TRIO UPS - UPS with integrated power supply, USB (Modbus/RTU), DIN rail mounting, Push-in connection, input: 1-phase, output: 24 V DC / 5 A

Product description

Supply DC loads reliably and save space with the TRIO uninterruptible power supplies. An input grid is no longer necessary for startup. Connected industrial PCs can be shut down easily via the integrated USB interface.

Your advantages

- · Space saving: Combination of UPS module and power supply in the same housing
- · Long buffer times, thanks to large selection of VRLA energy storage systems
- USB interface for connection to higher-level controllers such as industrial PCs
- · Startup from energy storage possible, even without mains input
- · Universal range of possible applications, thanks to a comprehensive package of approvals and an extended temperature range
- · Easy installation, thanks to push-in connection technology
