Re: CAIG Laboratories Heat Sink Compound (HSC67-6G)

CAIG Laboratories has made a temporary packaging change on its Heat Sink Compound, 6 grams size. Among other things, the current pandemic is causing shortages and lengthy lead times for packaging. While we are not sure how long it will last, this is temporary and we will get back to our normal package in the near future.

Previously, the Heat Sink Compound was presented in a squeeze tube that was packaged in a blister on a card like this:

The Heat Sink Compound will now come in a small jar, and be packaged in a hanging bag with a header card like this:

Please note that nothing else about this product has changed. It is the same Heat Sink Compound, in the same amount and with the same part number. CAIG Labs apologizes for any inconvenience this may have caused. We will be back to the old package soon!

Thank you for your continued use of CAIG Labs' products and your patience in this difficult time.
