# N-Channel 25-V (D-S) MOSFET

| PRODUCT SUMMARY     |                                   |                                 |                       |  |  |
|---------------------|-----------------------------------|---------------------------------|-----------------------|--|--|
| V <sub>DS</sub> (V) | R <sub>DS(on)</sub> (Ω)           | I <sub>D</sub> (A) <sup>a</sup> | Q <sub>g</sub> (Typ.) |  |  |
| 25                  | 0.0105 at V <sub>GS</sub> = 10 V  | 16.2                            | 12.4 nC               |  |  |
|                     | 0.0125 at V <sub>GS</sub> = 4.5 V | 13                              | 12.4110               |  |  |

Top View

Ordering Information: Si4668DY-T1-E3 (Lead (Pb)-free)

### FEATURES

- Halogen-free According to IEC 61249-2-21
  Available
- TrenchFET<sup>®</sup> Power MOSFET
- 100 % R<sub>g</sub> and UIS Tested

#### **APPLICATIONS**

- Synchronous Buck
- High Side

N-Channel MOSFET

Si4668DY-T1-GE3 (Lead (Pb)-free and Halogen-free)

| Parameter   |                        | Symbol                            | Limit                | Unit |  |
|---|------------------------|-----------------------------------|----------------------|------|--|
| Drain-Source Voltage                                |                        | V <sub>DS</sub>                   | 25                   | V    |  |

| Maximum Dawar Dissinction                           | T <sub>C</sub> = 70 °C | P                                 | 3.2                  | w    |  |
| Maximum Power Dissipation                           | T <sub>A</sub> = 25 °C | P <sub>D</sub>                    | 2.5 <sup>b, c</sup>  | VV   |  |
|   | T <sub>A</sub> = 70 °C | 1                                 | 1.6 <sup>b, c</sup>  |      |  |
| Operating Junction and Storage Temperature Range    |                        | T <sub>J</sub> , T <sub>stq</sub> | - 55 to 150          | °C   |  |

| THERMAL RESISTANCE RATINGS                  |              |                   |         |         |      |  |
|---|--------------|-------------------|---------|---------|------|--|
| Parameter                                   |              | Symbol            | Typical | Maximum | Unit |  |
| Maximum Junction-to-Ambient <sup>b, d</sup> | t ≤ 10 s     | R <sub>thJA</sub> | 43      | 50      | °C/W |  |
| Maximum Junction-to-Foot (Drain)            | Steady State | R <sub>thJF</sub> | 19      | 25      | 0/11 |  |

Notes:

a. Based on  $T_C = 25 \ ^{\circ}C$ .

b. Surface Mounted on 1" x 1" FR4 board.

c. t = 10 s.

d. Maximum under Steady State conditions is 95  $^{\circ}\text{C/W}.$

Notes:

a. Pulse test; pulse width  $\leq$  300  $\mu s,$  duty cycle  $\leq$  2 %

b. Guaranteed by design, not subject to production testing.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

#### TYPICAL CHARACTERISTICS 25 °C, unless otherwise noted

**VISHAY** 

\* The power dissipation  $P_D$  is based on  $T_{J(max)} = 150$  °C, using junction-to-case thermal resistance, and is more useful in settling the upper dissipation limit for cases where additional heatsinking is used. It is used to determine the current rating, when this rating falls below the package limit.

### TYPICAL CHARACTERISTICS 25 °C, unless otherwise noted

Normalized Thermal Transient Impedance, Junction-to-Foot

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package/tape drawings, part marking, and reliability data, see <u>www.vishay.com/ppg?69513</u>.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
