 This product is classified as a Class 1 Laser Product in IEC / JIS standards and a Class II Laser Product in FDA regulations. Do not look at the laser beam though optical system such as a lens.

## Easy measurement of outer diameter

### BASIC PERFORMANCE

#### High accuracy measurement

A red semiconductor laser is used as the emitting device and CCD is used as the receiving device. An ideally parallel optical beam is emitted enabling high accuracy measurement.

#### Safety countermeasures not required

Safety counter measures, such as protective gear, etc., are not required since LD-600 uses a Class 1 laser as per IEC standards, and LD-601 uses a Class II laser as per FDA regulations.

### FUNCTIONS

#### Various applications

The sensor can be used for various applications with its binary data output with four different sensing modes.

① **Width measurement / Dark mode**  
 The first dark region from the lower side of the measurement region is measured.

② **Width measurement / Light mode**  
 The first light region from the lower side of the measurement region is measured.

③ **Edge measurement / Dark mode**  
 The first dark edge from the lower side of the measurement region is sensed and the width from the dark edge to the upper side of the measurement region is measured.

④ **Edge measurement / Light mode**  
 The first light edge from the lower side of the measurement region is sensed and the width from the light edge to the upper side of the measurement region is measured.

#### Stable sensing

Shading correction function which compensates for receiver sensitivity variation and generates a uniform sensitivity distribution has been incorporated. Stable sensing over extended time periods is possible.

### VARIETIES

#### FDA regulation conforming

FDA regulation (Class II) conforming model LD-601 is available.

- Selection Guide

**APPLICATIONS**

**Sensing inclination or notch of wafer**

**Judging height of small objects**

**Measuring pipe's outer diameter**

**ORDER GUIDE**

**Sensor heads**

Appearance	Distance between emitter and receiver	Sensing width	Min. sensing object	Model No.	Applicable standards
	40 mm <b>1.575 in</b> (fixed)	15 mm <b>0.591 in</b>	$\phi 0.5$ mm $\phi 0.020$ in	<b>LD-600</b>	IEC / JIS
				<b>LD-601</b>	FDA / IEC / JIS

**Controller**

Appearance	Model No.	Output
	<b>LD-C60</b>	NPN open-collector transistor

Make sure to use the sensor head and the controller as a set.

**OPTIONS**

Designation	Model No.	Description
DIN rail adapter	<b>MS-DIN-IDC</b>	Adapter for mounting the controller on a 35 mm <b>1.378 in</b> width DIN rail

**DIN rail adapter**

• **MS-DIN-IDC**

2-M4 (length 12 mm **0.472 in**) screws with washers  
(2 pcs. attached with DIN rail adapter.)

**SPECIFICATIONS**

**Sensor heads**

Model No.	LD-600	LD-601
Item		
CE marking directive compliance	EMC Directive, RoHS Directive	
Applicable controller	<b>LD-C60</b>	
Distance between emitter and receiver	40 mm <b>1.575 in</b> (fixed)	
Sensing width	15 mm <b>0.591 in</b> (beam width: 20 mm <b>0.787 in</b> )	
Min. sensing object	ø0.5 mm <b>ø0.020 in</b>	
Resolution	11 µm <b>0.433 mil</b>	
Scan time	0.6 ms approx.	
Emitting element	Red semiconductor laser Class I (IEC / JIS standards) (Max. output: 0.2 mW, Peak emission wavelength: 670 nm <b>0.026 mil</b> )	Red semiconductor laser Class II (FDA regulations) (Max. output: 0.2 mW, Peak emission wavelength: 670 nm <b>0.026 mil</b> ) (IEC / JIS standards: Class 1)
Power indicator	Red LED (lights up when the power is ON)	—
Laser emission indicator	—	Green LED (Lights up during laser emission)
Ambient temperature	0 to +40 °C <b>+32 to +104 °F</b> (No dew condensation allowed) Storage: -10 to +60 °C <b>+14 to +140 °F</b>	
Ambient humidity	35 to 85 % RH, Storage: 35 to 85 % RH	
Enclosure earthing	Capacitor earth	
Material	Emitter enclosure: Die-cast zinc Receiver enclosure: Aluminum, Base: Aluminum Top cover: PPO, Front protection cover: Glass	
Cable	6-core (0.22 mm <sup>2</sup> × 4, 0.18 mm <sup>2</sup> × 2) cabtyre cable, 1 m <b>3.281 ft</b> long (with connector on one end)	
Weight	Net weight: 420 g approx.	
Accessories	M4 (length 12 mm <b>0.472 in</b> ) hexagon-socket-head bolt: 2 pcs.	M4 (length 12 mm <b>0.472 in</b> ) hexagon-socket-head bolt: 2 pcs. Laser attenuator: 1 pc.

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.

**Controller**

Model No.	LD-C60
Item	
CE marking directive compliance	EMC Directive, RoHS Directive
Applicable sensor heads	<b>LD-600, LD-601</b>
Sensing modes	Width measurement, edge measurement
Measuring accuracy	Width measurement: ±44 µm <b>±1.732 mil</b> Edge measurement: ±22 µm <b>±0.866 mil</b>
Supply voltage	24 V DC ±10 % Ripple P-P 10 % or less
Current consumption	250 mA or less (including sensor head)
Inputs (REQ, SHD)	Signal conditions: Low...0 to 1 V High...5 to 30 V, or open Applied voltage: 30 V DC or less
Outputs (ACK, D0 to D10)	NPN open-collector transistor • Maximum sink current: 20 mA • Applied voltage: 30 V DC or less (between output and 0 V) • Residual voltage: 1 V or less (at 20 mA sink current)
Output operation	ACK: ON during data output, D0 to D10: pixel binary output
Response time	1.2 ms or less
Indicators	Power: Red LED (lights up when the power is ON) REQ: Red LED (lights up when the REQ input is Low) ACK: Red LED (lights up when the ACK output is ON)
Measurement display	4 digit LED (letter height 8 mm <b>0.315 in</b> )
Display resolution	10 µm <b>0.394 mil</b>
Ambient temperature	0 to +40 °C <b>+32 to +104 °F</b> (No dew condensation allowed) Storage: -10 to +60 °C <b>+14 to +140 °F</b>
Ambient humidity	35 to 85 % RH, Storage: 35 to 85 % RH
Material	Enclosure: ABS, Front panel: ABS Display panel: Polycarbonate, Terminal cover: Polycarbonate
Weight	Net weight: 230 g approx.
Accessory	Connector: 1 pc.

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.

**I/O CIRCUIT AND WIRING DIAGRAMS (CONTROLLER)**

**I/O circuit diagram**

Symbols...D1: Reverse supply polarity protection diode  
D2: Reverse current protection diode  
Tr: NPN output transistor

Note: Insulate all unused wires individually to avoid miscontact.

**PRECAUTIONS FOR PROPER USE**

Refer to p.1595 for general precautions and p.1593~ for information about laser beam.

- This catalog is a guide to select a suitable product. Be sure to read instruction manual attached to the product prior to its use.

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

- This product is classified as a Class 1 Laser Product in IEC / JIS standards and a Class II Laser Product in FDA regulations. Do not look at the laser beam though optical system such as a lens.
- The following label is attached to the product. Handle the product according to the instruction given on the warning label.

(The English warning label based on FDA regulations is pasted on the FDA regulations conforming type.)

- This product has been designed to meet the specifications when a sensor is used along with the optional exclusive controller. If a controller other than the exclusive controller is used, not only the specifications may not be met, but it may also be a cause for malfunction or break down. Hence, please ensure to use this product along with the optional exclusive controller.
- Before using this product, please allow a warming up time of 3 min. approx. after the power supply is switched on.
- Never disassemble the sensor head.

**Safety standards for laser beam products**

- A laser beam can harm human being's eyes, skin, etc., because of its high energy density. IEC has classified laser products according to the degree of hazard and the stipulated safety requirements. The **LD** series is classified as Class 1 laser.

**Classification by IEC 60825-1**

Classification	Description
Class 1	Lasers that are safe under reasonably foreseeable conditions of operation, including the use of optical instruments for intrabeam viewing.

Note: **LD-601** conforms to FDA Class II.

[ Note: Refer to p.1594 for information about Laser Beam for the classification in FDA regulations. ]

**Safe use of laser products**

- For the purpose of preventing users from suffering injuries by laser products, IEC 60825-1 (Safety of laser products). Please check the standards before use. (Refer to p.1593~ for information about laser beam.)

**Conditions in use for CE conformity**

- The **LD** series is CE compliant and complies with EMC directives. EN 61000-6-2 is the applicable standard that covers immunities relating to use of this product, but in order to comply with this standard, the following conditions must be satisfied.

**Conditions**

- This controller should be connected less than 10 m 32.808 ft from the power supply.
- The signal line to connect with this controller should be less than 30 m 98.425 ft.

**Mounting**

- Mount the sensor head using the attached 2 pcs. M4 (length 12 mm 0.472 in) hexagon-socket-head bolts, with a tightening torque of 1.2 N·m or less.

- Mount the controller using 2 pcs. M4 pan head screws, with a tightening torque of 1.2 N·m or less.

## PRECAUTIONS FOR PROPER USE

Refer to p.1595 for general precautions and p.1593~ for information about laser beam.

### Wiring

- Make sure that the power supply is off while wiring.
- Verify that the supply voltage variation is within the rating.
- Make sure to use an isolation transformer for the power supply. If an auto-transformer (single winding transformer) is used, this product or the power supply may get damaged.
- In this sensor head, capacitor earth is used to enhance the noise characteristics. In case there is a high frequency noise generating equipment, such as, an ultrasonic welding machine, etc., near the sensor head and if the mounting base is electrically conducting (metallic, etc.), then insulate the sensor head from the mounting base.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of the sensor head or the controller, connect the frame ground (F.G.) terminal of the equipment to an actual ground.
- In case a surge is generated in the used power supply, connect a surge absorber to the supply and absorb the surge.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- In order to reduce noise, make the wiring as short as possible.

### Others

- This product is not a measuring instrument. Hence, the company does not offer any calibration services.
- Do not allow any water, oil, fingerprints, etc., which may refract light, or dust, dirt, etc., which may block light, to stick to the emitting / receiving surfaces of the sensor head. In case they are present, wipe them with a clean, soft cloth or lens paper.
- Avoid dust, dirt, and steam.
- Take care that the sensor head and the controller does not come in direct contact with water, oil, grease, or organic solvents, such as, thinner, etc.
- Take care that the sensor head and the controller are not directly exposed to fluorescent light from a rapid-starter lamp or a high frequency lighting device, as it may affect the sensing performance.
