

## Datasheet

The DXM100-B2 Wireless Controller is an industrial wireless controller that facilitates Industrial Internet of Things (IIoT) applications. As a communications gateway, it interfaces local serial ports, local I/O ports, and local ISM radio devices to the Internet using either a cellular connection or a wired Ethernet network connection.

- Sure Cross® DX80 Gateway or MultiHop 900 MHz or 2.4 GHz radio models available
- Logic controller with action rules and ScriptBasic programming
- Cellular modem Internet connectivity
- Automation protocols include Modbus® TCP, Modbus RTU, and EtherNet/IP™(1)
- Secure email and text messaging for alarms using Banner Cloud Data Services
- Data logging with a removable SD card
- Interactive programmable user interface with LCD and LED indicators
- Universal, on-board I/O with analog and discrete I/O
- Industry-standard RS-485, Ethernet, and USB communication ports
- Multiple managed power options with battery backup

## Model Key for the DXM100-B2 Models

Some example models include, but are not limited to, the following:

Models	Description
<b>DXM100-B2R1</b>	DXM100-B2 Wireless Controller with DX80 ISM 900 MHz radio
<b>DXM100-B2R2</b>	DXM100-B2 Wireless Controller with DX80 ISM 900 MHz MultiHop radio
<b>DXM100-B2R3</b>	DXM100-B2 Wireless Controller with DX80 ISM 2.4 GHz radio
<b>DXM100-B2R4</b>	DXM100-B2 Wireless Controller with DX80 ISM 2.4 GHz MultiHop radio

**Cellular Communication**—Controllers accept Banner LTE-M (CATM1) modems only. Cellular modems are ordered separately as accessories under the following part numbers:

- LTE CAT-M1 AT&T (North America only): **SXI-CATM1ATT-001**
- LTE CAT-M1 Verizon (United States only): **SXI-CATM1VZW-001**
- LTE CAT-M1/NB-IoT Multi-Carrier (Europe only): **SXI-CATM1WW-001**

## System Overview for the DXM100-B2 Models

Banner's DXM Logic Controller integrates Banner's wireless radio, cellular connectivity, and local I/O to provide a platform for the Industrial Internet of Things (IIoT).

Inputs and Outputs	Connectivity	Logic Controller	User Interface
Universal inputs	Cellular	Action rules	LCD screen
Discrete outputs	Sure Cross Radios	Programming language	LED indicators
Courtesy power and switch power	Ethernet	Scheduler	
DC latching outputs	USB	Push to the cloud	
Analog outputs	RS-485 client and RS-485 server	Data logging	
SDI-12 serial interface			

### Inputs and Outputs

On-board universal and programmable I/O ports connect to local sensors, indicators, and control equipment.

Universal inputs, discrete outputs, courtesy power and switched power outputs, DC latching outputs

Battery backup, solar controller, SDI-12 serial interface

**Connectivity**—The DXM100's wired and wireless connectivity options make it easy to share data between local and remote equipment. The cellular modem option eliminates the need for IT infrastructures to connect remote equipment for sensing and control. The integrated Sure Cross® wireless radio enables Modbus connectivity to remote sensors, indicators, and control equipment.

### Wired Connectivity

Ethernet: Modbus/TCP or Ethernet/IP  
Field Bus: Modbus RS-485 Client/Server

### Wireless Connectivity

Sure Cross® Wireless Radio: DX80 900 MHz, DX80 2.4 GHz, MultiHop 900 MHz, or MultiHop 2.4 GHz

Cellular modem: LTE-M (United States) or LTE-M/NB-IoT (outside the United States)

**Logic Controller**—Program the DXM's logic controller using action rules and/or ScriptBasic language, which can execute concurrently. The control functions allow freedom when creating custom sensing and control sequences. The logic controller supports the Modbus protocol standards for data management, ensuring seamless integration with existing automation systems. File and LCD password protection is an option.

### Register Mapping

Cyclical Read rules from wireless devices or local wired Modbus devices that include optional scaling, error conditions, and the ability to activate a read rule

Cyclical or Change of State write rules to wireless devices or local wired Modbus devices with scaling

Modbus/TCP Client read or write rules for external devices on the network

### Action Rules

Thresholds (IF/THEN/ELSE) with timers, minimum on/off time, and logging options

Math/Logic Rules (arithmetic and bitwise operators) Control Logic (logical operators and SR/T/D/JK flip flops)

Trending (multiple averaging filters)

Tracking (counts, on/off times) Push data on conditions

### Scheduler

Time/calendar-based events

Holiday skips and one-time events

Dynamic scheduler updating

Astronomical clock

### Optional Text Programming Language

ScriptBasic to create variables, arrays, functions, loops, IF/THEN/ELSE, logical and arithmetic operators, API commands, register access, string functions and operators, time commands

### Data Logging

Cyclic Data/event logging

**User Interface**—A simple user interface consists of an LCD screen and four LED indicators. Use the LCD to access system status and setup, view user-selectable events or data, and to bind and perform site surveys for Sure Cross radios. Configure the user-programmable LEDs to indicate the status of the DXM100, processes, or equipment.

### User-Programmable LCD

Binding Sure Cross radios

Conducting a Site Survey

Viewing sensor Information

Viewing the system's status

### User-Defined LED Indicators

Four multicolored LEDs: green, amber, and red

Programmable behavior

## Applications Overview

The DXM100-B2 Wireless Controller is ideal for smart factory and facilities applications, including:

- Productivity solutions, such as
  - Call for parts, service, or maintenance
  - Pick-to-light
  - Tank level monitoring
- Predictive maintenance and continuous monitoring using
  - Vibration and temperature monitoring
  - Non-contact temperature monitoring
- Environmental monitoring and control, such as
  - Temperature and humidity monitoring
  - Irrigation and agricultural monitoring

The DXM100-B2 Wireless Controller can provide visual indication using indicator lights, collect data, and interface with automation systems.

## Specifications

### Performance and MultiHop Radio Specifications

#### Radio Range

900 MHz, 1 Watt: Up to 9.6 km (6 miles)  
2.4 GHz, 65 mW: Up to 3.2 km (2 miles)

Radio range is with the 2 dB antenna that ships with the product. High-gain antennas are available, but the range depends on the environment and line of sight. Always verify your wireless network's range by performing a Site Survey.

#### Antenna Minimum Separation Distance

900 MHz, 150 mW and 250 mW: 2 m (6 ft)  
900 MHz, 1 Watt: 4.57 m (15 ft)  
2.4 GHz, 65 mW: 0.3 m (1 ft)

#### Radio Transmit Power

900 MHz, 1 Watt: 30 dBm (1 W) conducted (up to 36 dBm EIRP)  
2.4 GHz, 65 mW: 18 dBm (65 mW) conducted, less than or equal to 20 dBm (100 mW) EIRP

#### Antenna Connection

Ext. Reverse Polarity SMA, 50 Ohms  
Max Tightening Torque: 0.45 N·m (4 lbf·in)

#### Spread Spectrum Technology

FHSS (Frequency Hopping Spread Spectrum)

#### Link Timeout (Performance)

Gateway: Configurable via User Configuration Software  
Node: Defined by Gateway

#### Radio Packet Size (MultiHop)

900 MHz: 175 bytes (85 Modbus registers)  
2.4 GHz: 75 bytes (37 Modbus registers)

#### 900 MHz Compliance (1 Watt)

Radio module is indicated by the product label marking  
Contains FCC ID: UE3SX7023EXT: FCC Part 15, Subpart C, 15.247  
Contains IC: 7044A-SX7023EXT

#### 900 MHz Compliance (1 Watt)

Contains FCC ID: UE3RM1809: FCC Part 15, Subpart C, 15.247  
Contains IC: 7044A-RM1809  
IFT: RCPBARM13-2283

#### 2.4 GHz Compliance (DX80-2400 Radio Module)

Radio module is indicated by the product label marking  
Contains FCC ID: UE300DX80-2400: FCC Part 15, Subpart C, 15.247  
Radio Equipment Directive (RED) 2014/53/EU  
Contains IC: 7044A-DX8024  
ANATEL: 15966-21-04042

#### 2.4 GHz Compliance (SX243 Radio Module)

Radio module is indicated by the product label marking  
Contains FCC ID: UE3SX243: FCC Part 15, Subpart C, 15.247  
Radio Equipment Directive (RED) 2014/53/EU  
ETSI/EN: EN 300 328 V2.2.2 (2019-07) [RED HarmStds]  
Contains IC: 7044A-SX243  
ANATEL: 03737-22-04042

### DXM100-B2 Power and IO Specifications

#### Supply Voltage

12 to 30 V DC (use only with a suitable Class 2 power supply (UL) or a SELV (CE) power supply) or  
12 V DC solar panel and 12 V sealed lead acid battery

#### Courtesy Power Out

One output at 5 Volts, 500 mA maximum  
No short circuit protection

**Switched Power Outputs**

- Two adjustable 5 V to 24 V outputs
- One SDI-12 adjustable 5 V to 24 V output
- 5 V: 400 mA maximum
- 16 V: 125 mA maximum
- 24 V: 85 mA maximum

**Power Consumption**

- 35 mA average at 12 Volts (exclusive of load)

**Solar Power**

- 12 V sealed lead acid battery
- 2 A maximum charge current
- 12 V, 20 W maximum solar panel

**Solar Power Battery Charging**

- 1 A maximum with 20 Watt solar panel

**Communication Protocols**

- Modbus RTU Client/Server, Modbus TCP, and Ethernet/IP

**Security Protocols**

- VPN, SSL, and HTTPS

**Logging**

- 8 GB maximum; removable Micro SD card format

**Construction**

- Polycarbonate; DIN rail mount option

**Counters, Synchronous**

- 32-bits unsigned
- 10 ms clock rate minimum

**Universal Inputs**

- Sinking/Sourcing discrete, 4–20 mA analog, 0–10 V analog, counter, and temperature 10 kOhm thermistor

**Analog Outputs (DAC)**

- 0 to 10 V DC output
- Accuracy: 0.1% of full scale +0.01% per °C
- Resolution: 12-bit

**Discrete Output Rating (NMOS)**

- Less than 1 A max current at 30 V DC
- ON-State Saturation: Less than 0.7 V at 20 mA
- ON Condition: Less than 0.7 V
- OFF Condition: Open

## RS-485 Communication Specifications

**Communication Hardware (MultiHop RS-485)**

- Interface: 2-wire half-duplex RS-485

- Baud rates: 9.6k, 19.2k (default), or 38.4k via DIP switches;

- 1200 and 2400 via the MultiHop Configuration Software

- Data format: 8 data bits, no parity, 1 stop bit

## Environmental Specifications

**Operating Conditions**

- 20 °C to +60 °C (–4 °F to +140 °F)
- 95% maximum relative humidity (non-condensing)
- Radiated Immunity: 10 V/m (EN 61000-4-3)
- Operating the devices at the maximum operating conditions for extended periods can shorten the life of the device.

**Environmental Rating**

- IP20

**Shock and Vibration**

- All models meet IEC 60068-2-6 and IEC 60068-2-27 testing criteria
- Shock: 15G 11 ms duration, half sine wave per IEC 60068-2-27
- Vibration: 10 Hz to 55 Hz, 0.5 mm peak-to-peak amplitude per IEC 60068-2-6

**Required Overcurrent Protection**

**WARNING:** Electrical connections must be made by qualified personnel in accordance with local and national electrical codes and regulations.

Overcurrent protection is required to be provided by end product application per the supplied table.

Overcurrent protection may be provided with external fusing or via Current Limiting, Class 2 Power Supply.

Supply wiring leads < 24 AWG shall not be spliced.

**Certifications**

## Warnings

### WARNING:

- **Do not use this device for personnel protection**
- Using this device for personnel protection could result in serious injury or death.
- This device does not include the self-checking redundant circuitry necessary to allow its use in personnel safety applications. A device failure or malfunction can cause either an energized (on) or de-energized (off) output condition.

**IMPORTANT:** Please download the complete DXM100-B2 Wireless Controller technical documentation, available in multiple languages, from [www.bannerengineering.com](http://www.bannerengineering.com) for details on the proper use, applications, Warnings, and installation instructions of this device.

**IMPORTANT:** Por favor descargue desde [www.bannerengineering.com](http://www.bannerengineering.com) toda la documentación técnica de los DXM100-B2 Wireless Controller, disponibles en múltiples idiomas, para detalles del uso adecuado, aplicaciones, advertencias, y las instrucciones de instalación de estos dispositivos.

**IMPORTANT:** Veuillez télécharger la documentation technique complète des DXM100-B2 Wireless Controller sur notre site [www.bannerengineering.com](http://www.bannerengineering.com) pour les détails sur leur utilisation correcte, les applications, les notes de sécurité et les instructions de montage.

**Install and properly ground a qualified surge suppressor when installing a remote antenna system.** Remote antenna configurations installed without surge suppressors invalidate the manufacturer's warranty. Keep the ground wire as short as possible and make all ground connections to a single-point ground system to ensure no ground loops are created. No surge suppressor can absorb all lightning strikes; do not touch the Sure Cross® device or any equipment connected to the Sure Cross device during a thunderstorm.

**Exporting Sure Cross® Radios.** It is our intent to fully comply with all national and regional regulations regarding radio frequency emissions. **Customers who want to re-export this product to a country other than that to which it was sold must ensure the device is approved in the destination country.** The Sure Cross wireless products were certified for use in these countries using the antenna that ships with the product. When using other antennas, verify you are not exceeding the transmit power levels allowed by local governing agencies. This device has been designed to operate with the antennas listed on Banner Engineering's website and having a maximum gain of 9 dBm. Antennas not included in this list or having a gain greater than 9 dBm are strictly prohibited for use with this device. The required antenna impedance is 50 ohms. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen such that the equivalent isotropically radiated power (EIRP) is not more than that permitted for successful communication. Consult with Banner Engineering Corp. if the destination country is not on this list.

**IMPORTANT:**

- **Never operate a 1 Watt radio without connecting an antenna**
- Operating 1 Watt radios without an antenna connected will damage the radio circuitry.
- To avoid damaging the radio circuitry, never apply power to a Sure Cross® Performance or Sure Cross Multi-Hop (1 Watt) radio without an antenna connected.

**IMPORTANT:**

- **Electrostatic discharge (ESD) sensitive device**
- ESD can damage the device. Damage from inappropriate handling is not covered by warranty.
- Use proper handling procedures to prevent ESD damage. Proper handling procedures include leaving devices in their anti-static packaging until ready for use; wearing anti-static wrist straps; and assembling units on a grounded, static-dissipative surface.

## Banner Engineering Corp Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

**THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.**

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. **IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.**

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp. Any misuse, abuse, or improper application or installation of this product or use of the product for personal protection applications when the product is identified as not intended for such purposes will void the product warranty. Any modifications to this product without prior express approval by Banner Engineering Corp will void the product warranties. All specifications published in this document are subject to change; Banner reserves the right to modify product specifications or update documentation at any time. Specifications and product information in English supersede that which is provided in any other language. For the most recent version of any documentation, refer to: [www.bannerengineering.com](http://www.bannerengineering.com).

For patent information, see [www.bannerengineering.com/patents](http://www.bannerengineering.com/patents).

## FCC Part 15 Class A

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

## Industry Canada Statement for Intentional Radiators

This device contains licence-exempt transmitters(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil contient des émetteurs/récepteurs exemptés de licence conformes à la norme Innovation, Sciences, et Développement économique Canada. L'exploitation est autorisée aux deux conditions suivantes:

1. L'appareil ne doit pas produire de brouillage.
2. L'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

## Notas Adicionales

Información México: La operación de este equipo está sujeta a las siguientes dos condiciones: 1) es posible que este equipo o dispositivo no cause interferencia perjudicial y 2) este equipo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.

Banner es una marca registrada de Banner Engineering Corp. y podrán ser utilizadas de manera indistinta para referirse al fabricante. "Este equipo ha sido diseñado para operar con las antenas tipo Omnidireccional para una ganancia máxima de antena de 6 dBd y Yagi para una ganancia máxima de antena 10 dBd que en seguida se enlistan. También se incluyen aquellas con aprobación ATEX tipo Omnidireccional siempre que no excedan una ganancia máxima de antena de 6dBd. El uso con este equipo de antenas no incluidas en esta lista o que tengan una ganancia mayor que 6 dBd en tipo omnidireccional y 10 dBd en tipo Yagi, quedan prohibidas. La impedancia requerida de la antena es de 50 ohms."
