

AB-P00105

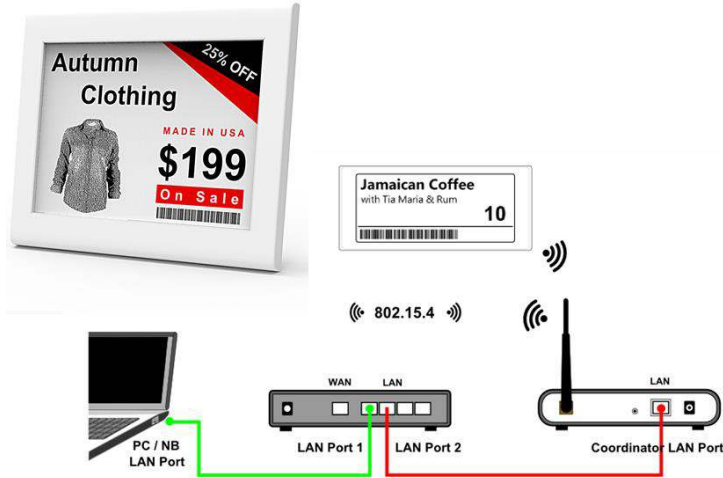

American Bright's Integrating Solution

Description:

American Bright's paper-like display technology provides high visibility and contrast displayed images in wide angle with low power consumption.

- Reflective display - No backlight is used
- Great for outdoor usage – more ambient light the brighter the display looks.
- Comfortable to read - Do not have eye fatigues as with LCDs
- Much Longer battery life

Integrated Solution:

The AB-P00105 Coordinator is the communication center in the store that transmits price information to the labels. Up to 3,000 labels can be managed per coordinator and the well-organizing network allows label management easily handling. Every Coordinator includes the transceiver, the communications hardware, and the back-end software that communicates with your existing retail systems. The high transmission rate of the 2.4GHz wireless technology and intelligent task scheduling enables fast and secure updates to price-tags of all sizes.

Technical Specifications:

Case Color	White
Status of LED	5 LEDs, Power, Zigbee-ACT, LAN-Link/ACT, reset
Ethernet	1 port, 10/100 Mbps
Antenna	1 Antenna 2.4G Single Band
Wireless Interface	Zigbee (2.4GHz)
Power Supply	5V DC/1A external power supply
Dimension (mm)	WxHxD: 147.8 x 85 x 22.8
Operating Temperature	0~40°C
