

Precision S2 Magnetic 25-in-1 Screwdriver Set

1 DESCRIPTION

This precision screwdriver set contains 24 bits, a lightweight aluminum alloy handle, and a compact sliding case to hold it all together. Each bit is marked with the "S2" stamp, indicating their high quality and material type. S2 is superior to lower grade steels such as Chromium Vanadium steel (CVS). The bits are magnetically held in the case to prevent them from easily falling out. The tip of the handle that holds the bits has a magnet, snapping the bits in with a satisfying swift motion.
