

DESCRIPTION

The MP1606 is a monolithic, step-down, switch-mode converter with built-in internal power MOSFETs. It achieves 2A continuous output current from a 2.5V-to-5.5V input voltage with excellent load and line regulation. MP1606 provides different fixed output voltage with PG function.

The Constant-On-Time control scheme provides fast transient response and eases loop stabilization. Fault protections include cycle-by-cycle current limiting and thermal shutdown.

The MP1606 is available in an ultra-small SOT563 package and requires a minimal number of readily available standard external components.

The MP1606 is ideal for a wide range of applications including high performance DSPs, wireless power, portable and mobile devices, and other low-power systems.

ELECTRICAL SPECIFICATION

Parameter	Symbol	Value	Units
Input Voltage	V_{IN}	2.5 – 5.5	V
Output Voltage	V_{OUT}	1.2	V
Output Current	I_{OUT}	2	A

Note: $V_{IN} < 3.3V$ may need more input capacitor.

FEATURES

- Low I_Q : 27 μ A
- 1.1MHz Switching Frequency
- EN for Power Sequencing
- 1% Output Voltage Accuracy
- Wide 2.5V-to-5.5V Operating Input Range
- V_{OUT} : 0.8/0.9/1.0/1.2/1.35/2.0/2.85/3.2V
- Power Good
- Up to 2A Output Current
- 75m Ω and 45m Ω Internal Power MOSFET Switches
- 100% Duty On
- Output Discharge
- V_o OVP
- Short-Circuit Protection with Hiccup Mode
- Available in a SOT563 Package

APPLICATIONS

- Wireless/Networking Cards
- Solid State Drives (SSD)
- Battery Powered Devices
- Low Voltage I/O System Power
- Multi Function Printer

All MPS parts are lead-free, halogen free, and adhere to the RoHS directive. For MPS green status, please visit MPS website under Quality Assurance.

"MPS" and "The Future of Analog IC Technology" are Registered Trademarks of Monolithic Power Systems, Inc.

EVB TEST RESULTS

Performance waveforms are tested on the evaluation board.

V_{IN} = 5V, V_{OUT} = 1.2V, L = 1.0 μ H, C_{OUT}=22 μ F, T_A = +25 $^{\circ}$ C, unless otherwise noted.

QUICK START GUIDE(MP1606GTF-XX)

Refer to Figure1 to set up fixed version. R1 and R2 must be removed. R4 connects PG pin and pulls up to Vin. MP1606GTF-12(-08, -09, -10, -135, -20, -285,-32) board provide corresponding fixed output voltage with PG function.

1. Connect the positive and negative terminals of the load to the VOUT and GND pins, respectively.
2. Preset the power supply output between 2.5V and 5.5V, and then turn off the power supply.
3. Connect the positive and negative terminals of the power supply output to the VIN and GND pins, respectively.
4. Turn the power supply on. The board will automatically start up. Fixed output versions are shown in Table 2.

Table 2—Fixed output version information

Part Number	Fixed V _{OUT} (V)
MP1606GTF-08	0.8
MP1606GTF-09	0.9
MP1606GTF-10	1.0
MP1606GTF-12	1.2
MP1606GTF-135	1.35
MP1606GTF-20	2.0
MP1606GTF-285	2.85
MP1606GTF-32	3.2
