EZ App Lynx is a smartphone/tablet application that pairs with a PIC<sup>®</sup> MCU over Bluetooth<sup>®</sup> and allows the PIC<sup>®</sup> MCUs to control the appearance and control of the GUI on the smartphone/tablet. This allows PIC<sup>®</sup> MCU developers an easy way to deploy sensors or controllers that can be controlled from a smartphone/tablet over Bluetooth<sup>®</sup>. Since the PIC<sup>®</sup> MCU controls all aspects of the GUI, the user only needs to install one smartphone/tablet application that works across a broad variety of devices.

**Bluetooth<sup>®</sup> Module**

This app requires a Bluetooth<sup>®</sup> connection to a PIC<sup>®</sup> MCU using the CCS C Compiler with the EZ App Lynx library. For more information on the application and where to download it, go to: <http://www.ccsinfo.com/ezapp>
