Item description

This controller is a compact PLC for the WAGO I/O System Advanced. The controller supports all I/O modules found within the WAGO I/O System Advanced Series in addition to network and fieldbus interfaces.

Two ETHERNET interfaces and an integrated switch enable line topology wiring.

The DIP switch configures the last byte of the IP address and may be used for IP address assignment.

An integrated Webserver provides user configuration options, while displaying the controller's status information.

Typical applications for this controller include standard machinery and equipment control (e.g., packaging, bottling and manufacturing systems, as well as textile, metal and wood processing equipment or systems).

Advantages:

- Programming per IEC 61131-3
- Programmable via *e!COCKPIT*

—
Subject to changes. Please also observe the further product documentation!
