## 10/100 Mbps Managed Optical Demarcation Compact CPE Device

IE-MiniFiberLinX-II - including LastGasp / Telco models

### **PRODUCT FEATURES**

- · Loopback troubleshooting
- SNMP Manageable
- Power options: AC, DC and 802.3af Power over Ethernet (PoE)
- Bi-directional Bandwidth control
- MTU: Supports over-sized packets up to 1916
- Supports passive 802.3ah OAM (Operation, Administration & Management

The compact IE-MiniFiberLinX-II and IE-MiniFiberLinX-II with LastGasp/Telco is one of the most versatile fiber optic NID devices available on the market today.

As a copper-to-fiber converter, the IE-MiniFiberLinX-II series (including LastGasp / Telco) supports multiple fiber types including multimode, singlemode, and single-strand fiber to increase the capacity of existing fiber. As a remote, CPE device, it can be connected via the fiber segment to an iMcV-FiberLinX-II Host module to support Host/Remote management.

It provides point-to-point fiber optic connections with a unique management tool to monitor the entire link between two locations. Both models are designed to work with -48 VDC power that is compliant with the Bellcore GR-499 specification, supporting the minimum and maximum transient voltages, typically required by transport equipment used in Telco environments. Additionally,one model offers Last Gasp, a Trap notification feature that identifies when the power lines are down or of a possible power supply failure. Other key features include; carrier grade remote SNMP management, extra tagging using Q-in-Q, and PoE (Power over Ethernet, on non-Telco version only).

Equipped with one 100 Mbps fiber data port, one 10/100 twisted pair port for data and management, as well as an auxiliary port designed to function as a serial port (when used with the included adapter), the IE-MiniFiberLinX-II/ LastGasp also offers multiple powering options: AC power (with included adapter), DC (through a 4-terminal power block).

Webserver Version iView<sup>2</sup> - free download from website.

# **10/100 Mbps Managed Optical Demarcation Compact CPE Device** IE-MiniFiberLinX-II - including LastGasp / Telco models

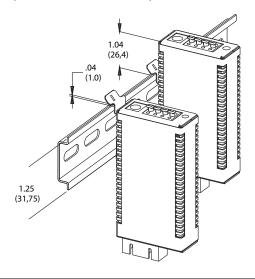

#### **SPECIFICATIONS** GENERAL

	GENERAL
	Preserves complete end-to-end fiber connection integrity
	Bi-directional bandwidth control (per port, per direction, per VLAN)
	Read/write IEEE 802.1Q VLAN-tags
	Extra Tagging with Q-in-Q mode (802.1p)
	Supports passive 802.3ah OAM (Operation, Administration & Management)
	QoS: IEEE 802.1p-based packet prioritization (2 queues [high/low] with 8 levels of priority)
	VLAN filtering up to 32 values
ļ	Layer 2 packet switching, store and forward operation
	Forwarding rate: 14,881 pps for 10 Mbps; 148,810 pps for 100 Mbps
ļ	AutoCross for MDI/MDIX
	Features Auto Negotiation and Selective Advertising
ļ	Supports Half and Full-Duplex operation
ļ	MTU: Supports over-sized packets up to 1916 bytes per packet
ļ	SECURITY
	Password Control
l	Multiple Access Levels: User Assigned Accounts & Access Levels
ļ	MANAGEMENT
	SNMP V1 and V2c compatible
	SNMP V1 and V2c compatible Includes GUI-based iView <sup>2</sup> software for remote management and upgrades
