

## Truss Experiment Kit

The Truss Experiment is specifically designed to get students excited about Statics by giving them hands-on experience in manufacturing physical objects from digital designs and engineering calculations. This bundle contains everything you need for approximately 5–10 students to get started on the Truss Experiment.

**Contents:**

- Flat End Mill, 1/16" (5)
- Aluminum sheet, 4"x4"x0.063" (10)
- Nitto double-sided tape (1)
