

TRBLU23 Bluetooth[®] Intelligent Serial Module

The Bluetooth® Intelligent Serial Module is specifically designed for applications where robust short range connectivity is required. This particular module provides a reliable Bluetooth connection that exceeds all requirements in terms of performance. The excellent range of up to 300 meters with very low power consumption of less than 36 mA makes this module a true class leader.

Key Features 🕴 🖍 Rolls

- Best-in-class range provides open field connectivity in excess of 300 meters
- Integrated high-performance ceramic antenna
- Adaptive frequency hopping to cope with interference from other wireless products
- Optimised receive sensitivity to provide long range initial connections that largely eliminate connection hysterisis
- A full industrial operating temperature range of -40°C to +85°C
- Data transfer rate up to 300 kbps
- Fully approved product
- Class 1 version 2.0 Bluetooth
- Receive sensitivity better than -84 dBm
- Support for 128 bit encryption
- Non-discoverable modes
- 40 way Hirose connector
- 2 X 8 bit ADCs
- 9 X GPIO
- Low power modes
- Lead free
- 2 year warranty
- Supports Wi-Fi co-existence
- Embedded Bluetooth stack
- Integrated antenna with up to 300m range
- External antenna version available

As well as incorporating a fully approved embedded Bluetooth protocol stack, the module includes a comprehensive AT style interface that dramatically reduces the development time of applications from months to days.

global solutions: local support.
