ideas for life

FOR PC BOARD TO WIRE

WIRE-PRESS SOCKETS (AXW)

FEATURES

1. Pressure welding method for superior wiring and no need to strip wires.

Applicable wires: AWG #22, #24, #26, #28.

2. Two pressure weldings assure high contact reliability.

3. Labor saving one-touch attachment of the cover and socket body.

4. Even if the number of wires is small, the stable pressure welding is acquired.

5. Angled hood cover type can save space and makes adjacent mounting possible.

Vertical hood cover type

Angled hood cover type

6. Fits MIL headers and low profile headers (box and open types).
7. Useful pressure welding tools are available.

APPLICATIONS

NC machine, automated equipment, office automation equipment, ME equipment, measurement equipment, communications equipment, amusement and game equipment.

Compliance with RoHS Directive

ORDERING INFORMATION

1. Socket

AXW 1 [] [] [] [] 1 A

1: Wire-press sockets (Socket)

<No. of contacts (2 digits)>

<Configuration and polarity guide position>

4: No polarity guide for 10 contact type, types with other number of contacts have 1 polarity guide in middle.

9: Polarity guide in middle for 10 contact type.

<Applicable cable>

Nil: Without contact

2: Pressure welding AWG#22 to #24

3: Pressure welding AWG#26 to #28

<Surface treatment (Pressure welding portion/Terminal portion)>

Nil: Without contact

1: Au plating/Sn plating

<Package form>

A: Individual package

2. Socket (Set)

AXW **3** **1** **A**

3: Wire-press sockets (Set)

<No. of contacts (2 digits)>

<Cover shape>

1: Semi-covers

2: Vertical type hood cover

3: Angle type hood cover

<Configuration and polarity guide position>

4: No polarity guide for 10 contact type,
types with other number of contacts have 1 polarity guide in middle.

9: Polarity guide in middle for 10 contact type.

<Applicable cable>

Nil: Without contact

2: Pressure welding AWG#22 to #24

3: Pressure welding AWG#26 to #28

<Surface treatment (Pressure welding portion/Terminal portion)>

Nil: Without contact

1: Au plating/Sn plating

<Package form>

<Sales form>

2: 5 in line

<Applicable cable>

2: Pressure welding AWG#22 to #24

3: Pressure welding AWG#26 to #28

<Surface treatment (Pressure welding portion/Terminal portion)>

1: Au plating/Sn plating

WIRING AND ASSEMBLY

1. When using small amounts (about 150 pins can be pressure welding per hour)

Process	1. Bend the contact back from the carrier, and set it in the pressure welding tool.	2. Insert the wire without removing its insulation unit it stops, and lightly grip the tool.	3. After press-fitting the wire, insert it into housing.	4. Attach the cover to complete the operation. (Note)
				
Necessary parts	 Stapler type AXY52000	 Contacts (5 in line)	 Separate wires	 Housing without contacts
				 Vertical type hood cover block

Note) There are 3 types of cover: semi-covers, vertical type hood cover blocks, and angle type hood cover blocks.

2. When using medium to large amounts (when using pliers-type pressure welding tool, about 450 pins per hour)

Process	1. Set the housing with contact in the pressure welding tool.	2. Insert the wires with insulation attached, until they touch the back, then use the tool's pressure welding operation.	3. Attach the cover to complete the operation. (Note)
			
Necessary parts	 Housing with contacts	 Separate wires	 Vertical type hood cover block
	 Pliers-type AXY51000		

Note) There are 3 types of cover: semi-covers, vertical type hood cover blocks, and angle type hood cover blocks.

Contacts (5 in line) (Notes 5 and 6)		5	AXW7221 (for AWG #22, 24)	AXW7231 (for AWG #26, 28)	40 rows (200pcs.)	400 rows (2,000 pcs.)	

Notes) 1. The parts above are packaged individually. (Contact is tray packing)

2. The vertical type hood cover block is packaged with two covers (one with nuts), one wire bunding metal.

3. The angled type hood cover block is packaged with two covers and one wire bunding band.

4. The angled type hood cover for less than 20 contacts and the vertical type hood cover for less than 14 contacts are not available. Please use the semi-cover.

5. There is a mark "22" on contacts for AWG #22 and #24, and mark "26" for AWG #26 and #28.

6. Remarks for contacts

1) Reel packaging is available.

2. Set products (produced after order)

Set products are produced after an order is received, so if you have a tight deadline, please order the products on the above as stand-alone products.

- Notes) 1. Full-set products (Housing with contact and cover included)
 (1) Suitable for use with pliers type.
 (2) Produced after an order is received. If you are in a hurry, please order a housing with contact and cover separately from the list above.
 2. Half-set products (Housing without contact and cover included)
 (1) Suitable for use with stapler-type pressure welding tool
 (2) As half-sets do not include a contact, order the appropriate stand-alone contact from the list above.
 (3) Produced after an order is received. If you are in a hurry, please order a housing without contact, contacts and cover separately from the list on page 235.

Discontinued as of September 30, 2010

AXW

SPECIFICATIONS

1. Characteristics

Item		Specifications	Conditions
Electrical characteristics	Rated current	AWG#22, 24: 3A, AWG#26: 2A, AWG#28: 1A	
	Rated voltage	250V AC	
	Breakdown voltage	1,000V AC for 1 min.	Detection current: 1mA
	Insulation resistance	Min. 1,000MΩ	Using 500V DC megger
	Contact resistance	Max. 20mΩ	Measured based on the HP4338B measurement method of JIS C 5402
Mechanical characteristics	Unit removal force	Min. 0.343N {35gf}	Measured by steel-pin-gauge with 0.64±0.01mm square (surface roughness 0.1μm)
	Composite insertion force	Max. 2.94N {300gf} × No. of contacts	
Life time characteristics	Insertion and removal life	500 times	Repeat insertion and removal speed of max. 600 times/hour
Environmental characteristics	Ambient temperature	-50°C to 105°C	No freezing at low temperatures Ambient temperature of cables should be considered
	Vibration resistance	Double amplitude: 1.52mm Frequency: 10 to 55Hz (for 3 axes)	No interruption of current longer than 1μs (Max. carrying current 100mA should be impressed during the test)
	Shock resistance	490m/s ² {50G} (for 3 axes)	No interruption of current longer than 1μs (Max. carrying current 100mA should be impressed during the test)

2. Materials and surface treatment

Part name		Materials	Surface treatment
Housing		Glass fiber reinforced PBT (UL94V-0)	—
Cover	Semi-cover	Glass fiber reinforced PBT (UL94V-0)	—
	Hood cover	Glass fiber polycarbonate resin (UL94V-0) Vertical type hood cover (16, 20 contact)	—
Contact		Copper alloy	Contact portion: Ni plating on base, Au plating on surface Contact pressure portion: Ni plating on base, Sn plating on surface
Lead wire bundling metal (enclosed with vertical type hood cover)		Steel plate	—
Lead wire bundling band (enclosed with angled type hood cover)		Polyimide resin	—

3. Applicable cable

No.	Cross section area	External figure	Rated current	Remarks
AWG#22	0.3 mm ²	1.5 to 1.1 dia.	3A	12 wires/0.18 should used
AWG#24	0.2 mm ²		3A	
AWG#26	0.14mm ²	1.3 to 1.1 dia.	2A	
AWG#28	0.08mm ²		1A	

DIMENSIONS (Unit: mm)

The CAD data of the products with a **CAD Data** mark can be downloaded from: <http://panasonic-electric-works.net/ac>

• Housing with contacts

CAD Data

Dimension table (mm)

No. of contacts	Polarity guide	A	B
10	0	17.3	10.16
10	1	17.3	10.16
14	1	22.4	15.24
16	1	24.9	17.78
20	1	30.0	22.86
26	1	37.6	30.48
30	1	42.7	35.56
34	1	47.8	40.64
40	1	55.4	48.26
50	1	68.1	60.96
60	1	80.8	73.66
64	1	85.9	78.74

General tolerance: ±0.3

Note) Dimensions of the housing without contact is the same as the right figure.

• **Socket**

1) When vertical type hood covers are mated (16, 20, 26, 30, 34, 40, 50, 60 and 64 contacts)

CAD Data

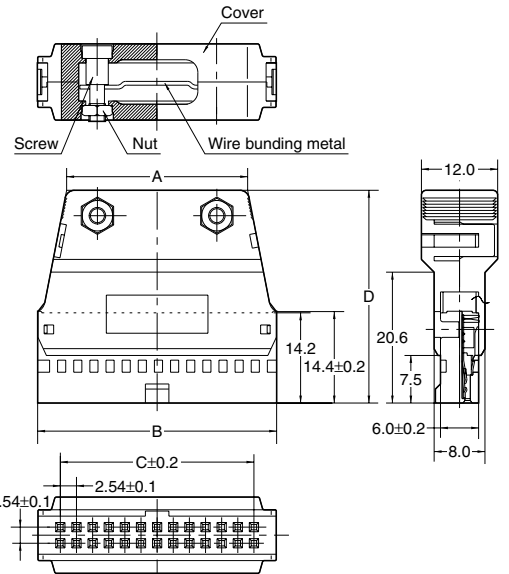

Dimension table (mm)

No. of contacts	A	B	C	D
16	24.0	24.92	17.78	33.5
20	27.8	30.0	22.86	33.5
26	28.5	37.6	30.48	33.5
30	33.5	42.7	35.56	33.5
34	38.6	47.8	40.64	33.5
40	43.6	55.4	48.26	41.5
50	56.0	68.1	60.96	41.5
60	68.7	80.8	73.66	41.5
64	73.8	85.9	78.74	41.5

16 and 20 contacts

26 to 64 contacts

General tolerance: ±0.3

2) When angle type hood covers are mated (26, 30, 34, 40, 50, 60 and 64 contacts)

CAD Data

Dimension table (mm)

No. of contacts	A	B	C	D
26	40.5	37.5	30.48	41.5
30	45.6	42.6	35.56	41.5
34	50.7	47.7	40.64	41.5
40	62.5	55.3	48.26	52.5
50	75.2	68.0	60.96	52.5
60	87.9	80.7	73.66	52.5
64	93.0	85.8	78.74	52.5

General tolerance: ±0.3

3) When semi-covers are mated

CAD Data

Dimension table (mm)

No. of contacts	A	B
10	17.3	10.16
14	22.38	15.24
16	24.92	17.78
20	30.0	22.86
26	37.62	30.48
30	42.7	35.56
34	47.78	40.64
40	55.4	48.26
50	68.1	60.96
60	80.8	73.66
64	85.88	78.74

General tolerance: ±0.3

4) Contacts (5 in line)

CAD Data

Examples of wire for AWG #22 and #24 types, and "26" for AWG #26 and #28 types.

General tolerance: ±0.3

NOTES

1. Use wires and contact types that match.

The contact's clamp is tamped with 22 or 26.

Use AWG#22 or #24 wire with the type 22 contact and AWG #26 or #28 wire with the type 26 contact.

An incorrect combination will cause faulty connections.

2. Use wires having a correct outer insulation diameter.

The use of a wire with an outer insulation diameter larger than the allowable value or a wire with a hard material for the insulation will cause faulty connections.

Furthermore, the use of a wire with an outer insulation diameter less than the allowable value will cause a drop in the clamp strength. Use wires with a suitable outer diameter and insulation material. Suitable wire diameters are shown in the table below.

Suitable wire diameters

Size	Insulation outer diameter	Remark
AWG#22	1.5 dia. to 1.1 dia.	AWG #22 is Stranded wire of 12 strands/0.18
AWG#24		Stranded wire
AWG#26	1.3 dia. to 1.1 dia.	Stranded wire
AWG#28		

* AWG#22 and #24 use different contacts from AWG#26 and #28. Refer to the part number chart for the part number.

3. Inserted wire length during wire pressure welding

Insert the wire to a proper length and perform the pressure welding.

If the inserted length is too short, the wire will be pressure welded only at one location.

If the inserted length is too long, the wire will end up on the lance portion and a proper pressure welding will not be obtained.

4. Cut the end of the wire so that it is straight and flat. Be sure no uneven strands remain.

5. When pressure welding a wire, fully insert it to the proper position. Be sure to squeeze the lever unit it reaches the end position of the stroke.

6. After connecting the wire, check that the wire clamp firmly clamps the wire.

7. It may not be possible to cut a contact from the carrier by folding the contact only once.

8. The contact holder should be replaced as needed.

For other details, please verify with the product specification sheets.

PRESSURE WELDING TOOLS FOR SEPARATE WIRES

PRODUCT TYPES

Product name		Part No.	Packaging	
			Inner carton	Outer carton
Pressure welding tool	Pliers type pressure welding tool for separate wires (with feed mechanism)	AXY51000	—	1 pc.
	Stapler type pressure welding tool for separate wires	AXY52000	—	
Accessory	Contact holder	AXY5801	—	200 pcs.

• Pliers-type (with feed mechanism)

Pliers-type pressure welding tool for separate wires (with feed mechanism)
AXY51000

Compliance with RoHS Directive

FEATURES

1. Weight balanced design for lightweight handling.

2. Lever Lock Mechanism Allows Reliable Pressure Welding

The lever lock mechanism prevents the lever from returning until the predetermined stroke is reached. This allows for reliable pressure welding, preventing variation due to differences between individual workers.

3. Automatic feed mechanism indicates the pressure welding terminal number after a pressure welding.

After each pressure welding, the automatic feed is performed one pitch at a time (2.54mm). At the same time, the number of the connector terminal being pressure-welded is indicated. If the terminal number is set initially, the connector can be moved to any position with the correct terminal number always displayed since the tool is directly linked with the connector.

4. Stroke adjustment feature.

The pressure welding stroke can be adjusted to match the diameter of the cable wire for reliable connections.

5. Enables pressure welding of both the socket with contacts and individual contacts.

A cable can be connected with the contacts positioned in the socket housing (socket housing with contacts) or with the individual contacts separated from the socket housing.

6. Contact puller feature.

The contact puller permits incorrectly connected or unnecessary contacts to be pulled out.

• Stapler type

Stapler type pressure welding tool for separate wires
AXY52000

Compliance with RoHS Directive

FEATURES

1. Compact and lightweight, it fits in a pocket.

2. Pressure-weld individual contacts.

3. Convenient for on-site maintenance work since connection is possible in small spaces.

4. Includes a contact puller.

NOTES

1. Never disassemble the tool. Also, do not subject it to shock or drop it from a high place.

For other details, please verify with the product specification sheets.
