Panasonic's unique Easy-To-Use (ETU) series of modules, plug directly into evaluation kits with the added benefit of header connectors that simplify prototype wiring and field trials.

The engine of the PAN1315ETU is Panasonic's new PAN1315 Host Controlled Interface (HCI) Bluetooth RF module based upon Texas Instrument's seventh generation Bluetooth core integrated circuit, the CC2560.

The PAN1315 series has been designed to be 100% pin compatible with the next generation of Bluetooth Low Energy devices. This unique design feature enables designers to seamlessly transition between Bluetooth Classic and Low Energy modules.
