

NOsparc® GCLAC3F480 DATA SHEET

PRODUCT OVERVIEW

The NOsparc® GCLAC3F480 contact arc suppressor (AC power applications) protects, cleans, and restores the contact points of 3-phase relays and contactors. This improves their overall performance and extends contact life to the mechanical life of the relay or contactor.

The NOsparc GCLAC3F480 arc suppressor is designed to suppress contact arcing from 110Vac to 480Vac. NOsparc AC arc suppressors connect across the contact terminals on existing products and equipment using two wires per contact, plus a connection to the contactor's coil.

NOsparc AC power arc suppressors support the following AC power loads:

- General Purpose
- Capacitive
- Resistive
- Tungsten
- Ballast
- Pilot Duty
- Inductive
- Heater
- Motor

NOsparc is effective even under mixed load conditions.

SYSTEM WIRING

Arc suppressor connects in parallel across each respective contact (phase) as shown, with a separate connection to the contactor coil. Make sure installation uses accepted proper crimping standards and is compliant with all safety regulations.

IMPORTANT NOTE

NOsparc will be damaged if arc suppressor connected across the following locations where there is NO arcing: LOAD, POWER, and/or COIL.
