GS-ADK-ProviOSWAC / GS-ADK-ProviOSWAC-S2W

- iOS provisioning method
- Wireless Access Configuration (WAC) chip required

These GainSpan ADKs include a GS2000 Evaluation Board with embedded Wireless Accessory Configuration (WAC) IC from Apple. They also include embedded code and the iOS mobile app for provisioning WAC-enabled devices using an iOS device (must be an MFI licensee from Apple). These ADKs, similar to the Provisioning 2000 ADK, enable commissioning/provisioning and configuration of the GainSpan modules during installation or for configuring GainSpan Wi-Fi modules during normal operation. Users can quickly configure the Wi-Fi parameters of GainSpan-based IoT product using an iOS device.
