PQ5EV3/PQ5EV5/ PQ5EV7

Large Output Current Type Low Power-Loss Voltage Regulator

■ Features

1. Low power-loss
   (Dropout voltage: MAX.0.5V)
2. Package with exposed radiation fin
   (Equivalent to TO-220)
3. Large output current
   3.5A:**PQ5EV3**, 5A:**PQ5EV5**, 7.5A:**PQ5EV7**
4. Variable output voltage (1.5V to 5V)
5. High-precision output type
   (Reference voltage precision:±1.0%)
6. Overcurrent, overheat protection functions

■ Applications

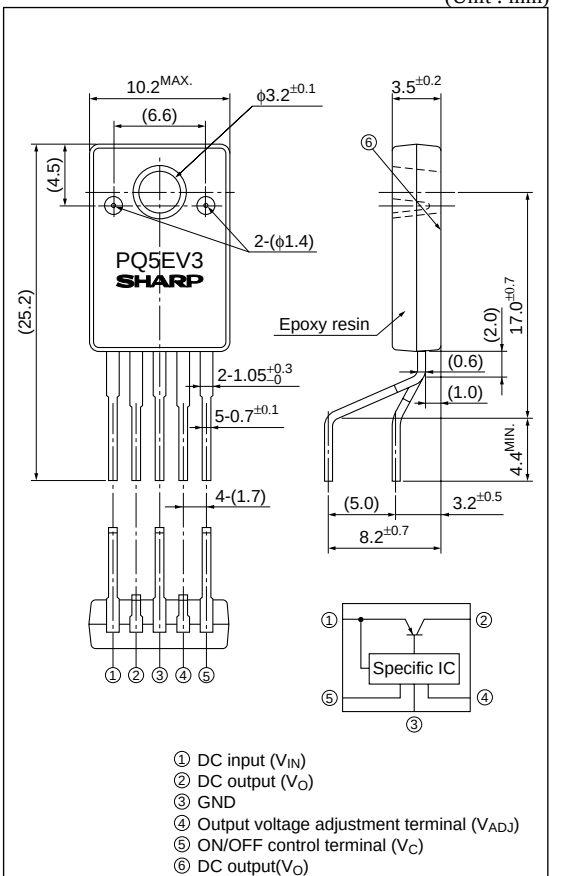
1. Personal computers
2. Power supplies for various electronic equipment such as AV or OA

■ Absolute Maximum Ratings (Ta=25°C)

Parameter		Symbol	Rating	Unit
*1Input voltage		V_{IN}	7	V
Dropout voltage		V_{I-O}	4	V
*1Output control voltage		V_C	7	V
*1Output adjustment terminal voltage		V_{ADJ}	5	V
Output current	**PQ5EV3**	I_O	3.5	A
	PQ5EV5		5.0	
	PQ5EV7		7.5	
*2Power dissipation		P_{D1}	1.6	W
		P_{D2}	45	W
*3Junction temperature		T_j	150	˚C
Operating temperature		T_{opr}	−20 to +80	˚C
Storage temperature		T_{stg}	−40 to +150	˚C
*4Soldering temperature		T_{sol}	260	˚C

*1 All are open except GND and applicable terminals
*2 P_{D1}:No heat sink, P_{D2}:With infinite heat sink
*3 Overheat protection may operate at the condition T_j:125˚C to 150˚C
*4 For 10s

■ Outline Dimensions (Unit : mm)



∗ ( ) : Typical dimensions

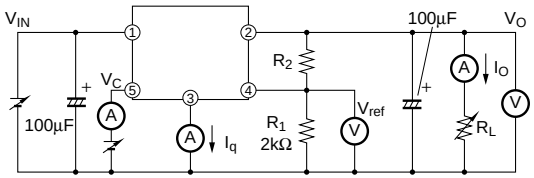
■ Electrical Characteristics

(Unless otherwise specified, V_{IN}=5V, *5,V_O=3V (R_1=2kΩ) , Ta=25˚C)

Parameter	Symbol	Conditions	MIN.	TYP.	MAX.	Unit
Input voltage	V_{IN}	–	2.35	–	7	V
Output voltage	V_O	–	1.5	–	5	V
Reference voltage	V_{ref}	–	1.2276	1.24	1.2524	V
Load line regulation	$R_{eg}L$	I_O=5mA to rating	–	0.1	0.5	%
Input line regulation	$R_{eg}I$	V_{IN}=4 to 7V, I_O=5mA	–	0.05	0.1	%
Reference voltage temperature coefficient	T_CV_{ref}	T_j=0 to 125˚C	–	±1	–	%
Ripple Rejection	RR	Refer to Fig.2	60	70	–	dB
Dropout voltage	V_{I-O}	*6	–	–	0.5	V
*7 Output on control voltage	$V_{C\ (ON)}$	–	2	–	–	V
Output on control current	$I_{C\ (ON)}$	V_C=2.7V	–	–	20	µA
Output off control voltage	$V_{C\ (OFF)}$	–	–	–	0.8	V
Output off control current	$I_{C\ (OFF)}$	V_C=0.4V	–	–	–0.4	mA
Non-operating dissipatiion current	I_q	I_O=0A	–	10	15	mA

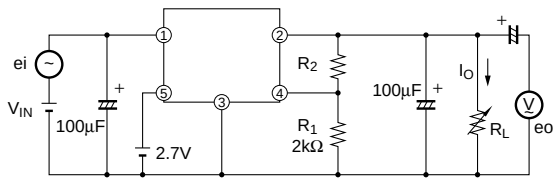
*5 **PQ5EV3**:I_O=1.75A, **PQ5EV5**:I_O=2.5A, **PQ5EV7**:I_O=3.75A
*6 **PQ5EV3**:I_O=3.5A, **PQ5EV5**:I_O=5A, **PQ5EV7**:I_O=7.5A. Input voltage shall be the value when output voltage is 95% in comparison with the initial value
*7 In case of opening control terminal 5, output voltage turns on.

Fig.1 Standard Test Circuit



$V_O=V_{ref}\times(1+R_2/R_1)$
$=1.24\times(1+R_2/R_1)$
[R_1=2kΩ, V_{ref}≒1.24V]

Fig.2 Test Circuit for Ripple Rejection



f=120Hz (sine wave)
ei(rms)=0.5V
V_O=3V (R_1=2kΩ)
V_{IN}=5V
I_O=0.5A
RR=20log (ei(rms)/eo(rms))

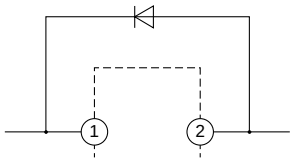
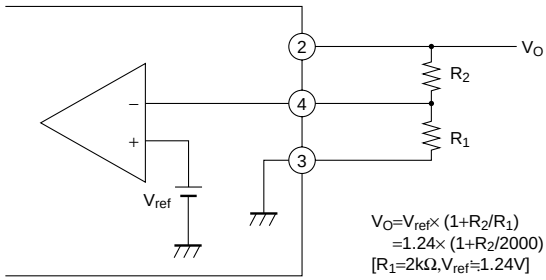
■ Precautions for Use

1. The connecting wiring of C_O and each terminal must be as short as possible. Owing to type, value and wiring condition of capacitor, it may oscillate. Confirm the output waveform under the actual condition before using.
2. ON/OFF control terminal ⑤ is compatible with LS-TTL. It enables to be directly drive by TTL or C-MOS standard logic (RCA4000 series) . If ON/OFF control terminal is not used, it is recommended to directly connect applicable terminals with input terminal.
3. If voltage is applied under the conditions that the device pin is connected divergently or reversely, the deterioration of characteristics or damage may occur. Never allow improper mounting.
4. If voltage exceeding the voltage of DC input terminal ① is applied to the output terminal ②, the element may be damaged. Especially when the DC input terminal ① is short-circuited to the GND in ordinary operating state, charges accumulated in the output capacitor C_O flow to the input side, causing damage to the element. In this case, connect the ordinary silicon diode as shown in the figure.



■ Adjustment of Output Voltage

1. Output voltage is able to set (1.5V to 5V) when resistors R_1, R_2 are attached to ②, ③, ④ terminals. As for the external resistors to set output voltage, refer to the following figure and Fig.18.



NOTICE

- The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property rights. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP's devices.
- Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structure, and other contents described herein at any time without notice in order to improve design or reliability. Manufacturing locations are also subject to change without notice.
- Observe the following points when using any devices in this publication. SHARP takes no responsibility for damage caused by improper use of the devices which does not meet the conditions and absolute maximum ratings to be used specified in the relevant specification sheet nor meet the following conditions:

(i) The devices in this publication are designed for use in general electronic equipment designs such as:
- Personal computers
- Office automation equipment
- Telecommunication equipment [terminal]
- Test and measurement equipment
- Industrial control
- Audio visual equipment
- Consumer electronics

(ii) Measures such as fail-safe function and redundant design should be taken to ensure reliability and safety when SHARP devices are used for or in connection with equipment that requires higher reliability such as:
- Transportation control and safety equipment (i.e., aircraft, trains, automobiles, etc.)
- Traffic signals
- Gas leakage sensor breakers
- Alarm equipment
- Various safety devices, etc.

(iii) SHARP devices shall not be used for or in connection with equipment that requires an extremely high level of reliability and safety such as:
- Space applications
- Telecommunication equipment [trunk lines]
- Nuclear power control equipment
- Medical and other life support equipment (e.g., scuba).

- Contact a SHARP representative in advance when intending to use SHARP devices for any "specific" applications other than those recommended by SHARP or when it is unclear which category mentioned above controls the intended use.
- If the SHARP devices listed in this publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Control Law of Japan, it is necessary to obtain approval to export such SHARP devices.
-
- Contact and consult with a SHARP representative if there are any questions about the contents of this publication.
