

Passport II Pro

61W USB-C Power Delivery | GaN Technology |
Charge 6 Devices | 10A Auto-Resetting Fuse |
Works in 200 Countries

| 61W PD, Fast Charge Laptops & Phones

Passport II Pro is the first travel adapter equipping with 61W USB-C Power Delivery by adopting GaN technology. With 61W USB-C PD, Passport II Pro is able to fast charge most USB-C laptops, tablets, phones and other USB-C devices. It can fully charge MacBook Pro 13" in 2 hours. Passport II Pro also supports PD 3.0/QC 3.0/AFC/FCP/3A PPS quick charge protocols to fast charge Apple, Samsung, HUAWEI and other smartphones up to 18W.

| A Safer 10A Auto-Resetting Fuse

The advent of Auto-Resetting fuse free travelers from searching through an electronics store to find a replacement fuse while traveling. Passport II Pro upgrades to 10A Auto-Resetting Fuse from 6A to guarantee electricity safety. Under the protection from 10A Auto-Resetting Fuse, Passport II Pro can withstand up to 2500W, 10A current, allowing travelers to use high-power electrical appliances like hair dryer, hair straightener or electric kettle.

| Power 6 Devices Simultaneously

Build for travel light, Passport II Pro equips with 5 USB ports (2 USB-C ports & 3 USB-A ports) and a multi-region AC outlet, which is able to charge up to 6 devices at the same time. It is compatible with laptops, smartphones, tablets, Nintendo Switch and other devices. A Passport II Pro is competent for all devices charging during an international travel. It helps travelers save luggage space by replace chargers.

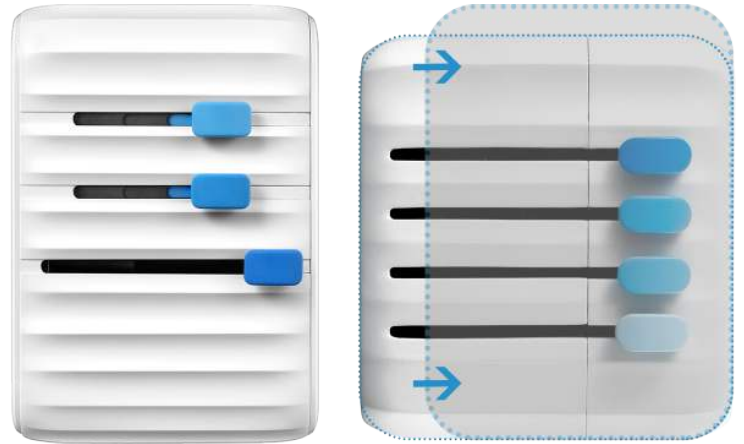

| Worry-free to Travel Over 200 Countries

Passport II Pro integrates four retractable US, UK, EU and AU plugs into one sleek unit to work seamlessly in over 200 countries and regions. Passport II Pro adopts the unique "Press & Slide" control system to select the appropriate plug for a better user experience. Easy to pack, easy to unpack, and easy to use.

Smaller, yet Powerful

By adopting the cutting-edge GaN technology, Passport II Pro comes in a smaller size, which is 20% smaller than its predecessor – Passport 30W. Passport II Pro is more compact to carry, easy to fit in luggage, bag and even pocket, but still remains a powerful performance.
