

RAYNGER® ST™ 20 PRO

THE PROFESSIONAL'S CHOICE FOR VALUE AND PRECISION

Raytek's ST20 Infrared Non-Contact Thermometers offer accurate readings in a compact and reliable design. The ST20 Pro has a temperature range of -25 to 999°F (-32 to 535°C), a 500 msec reading response time and a weight of 11 ounces. This thermometer is safe to use as it requires no contact with the surface measured so long as it is within the thermometer's range (D:S=12:1).

With the ST 20's extra-bright single-point laser sighting, MAX temperature displays and rugged rubber over molding, it can prevent downtime by permitting preventative and predictive maintenance by simply pointing, shooting and reading temperature measurements. This thermometer is perfect for automotive and diesel applications, facility maintenance, fire safety, marine maintenance, electrical and industrial, asphalt work and HVAC systems; and these are just a few of the applications in which the ST20 can be utilized.
