The Weidmüller **Multitool** for use with connectors, offers many different functions.

Weidmüller's **multi-stripax® PV** is a trend-setting multi-functional tool for solar cables. A wide variety of uses are possible without the need for a blade change. The cutting and stripping functions are available in a single tool. These features speed up the work flow.

Reliable electrical connections require specific professional tools which can cope with the mechanical stresses that can occur during use. This is ensured by our new crimping tool **CTF PV WM4** for Weidmüller's WM4 photovoltaic contacts.

General ordering data

Order No.	1254870000
Type	VSSO WM4
GTIN (EAN)	4050118047479
Qty.	100 pc(s).
