

Bridgelux® EB Series™ Slim

Product Data Sheet DS170

Introduction

EB Series™

EB Slim linear modules are designed for use in premium indoor applications where high efficacy is required. The new generation uses the high-efficacy SMDs to achieve over 170lm/W, which enables designers and fixture manufacturers to meet DLC Standard requirements. They are designed for linear troffers, pendants and other luminaires in indoor commercial applications.

Available in 340 mm, 590 mm, and 1190 mm lengths, the modules can be connected end-to-end thereby providing flexibility in designing luminaires. The *slim* width of the module enables easy integration into space constrained luminaires. These modules are easily mountable and offer reusable poke-in connectors.

Features

- High efficacy up to 170 lm/W (nominal)
- Available in 80 CRI
- Available in color temperatures from 3000K to 5000K
- Wide lumen range with 2.4x overdrive capability
- Long lifetime (L80, B50 > 50,000 hours)

Benefits

- Achieve over 170 lm/W by under-driving
- Heat-sinking may not be required at low drive currents
- Reliable use at elevated currents for greater design flexibility
- Easy installation using mounting holes and poke-in connectors

Product Feature Map

Bridgelux EB Series Slim modules are fully engineered devices that provide consistent thermal and optical performance on an engineered mechanical platform. The linear products incorporate several features to simplify design integration and assembly. Please visit www.bridgelux.com for more information on the EB Series family of products.

Product Nomenclature

The part number designation for Bridgelux EB Slim is explained as follows:

Notes for Table 1:

1. Nominal CCT as defined by ANSI C78.377-2011.
2. Data is at nominal test current where temperature of center case temperature point $T_c = 25^\circ \text{C}$.
3. Bridgelux maintains a $\pm 7\%$ tolerance on flux data.

Electrical Characteristics

Notes for Table 2:

1. Voltage minimum and maximum are provided for reference only and are not a guarantee of performance.
2. Bridgelux maintains a tolerance of $\pm 0.1 \text{ V}$ on forward voltage data.
3. This product has been designed and manufactured per IEC 62031:2014. The working voltage designated for the insulation is 60 V d.c. The maximum allowable voltage across the module must be determined in the end product application.
4. Typical coefficient of forward voltage tolerance is $\pm 0.1 \text{ mV}$ for nominal current.
5. V_f min hot and max cold values are provided as reference only and are not guaranteed. These values are provided to aid in driver design and selection over the operating range of the product.

Absolute Maximum Ratings

Table 3: Maximum Ratings

Parameter	Maximum Rating
Storage Temperature	-40°C to +85°C
Operating Case Temperature ² (T _c)	85°C
Soldering Temperature	350°C or lower for a maximum of 5 seconds
Maximum Reverse Voltage	Modules are not designed to be driven in reverse bias
Maximum Drive Current	1700mA

Notes for Table 3:

- 1. For IEC 62717 requirement, please consult your Bridgelux sales representative.
- 2. Lumen maintenance (L70) and lifetime predictions are valid for drive current and case temperature conditions used for LM-80 testing as included in the applicable LM-80 test report for the SMDs used in the modules. Contact your Bridgelux sales representatives for LM-80 report.

Figure 16: Product Labeling

Bridgelux EB Series Slim modules contain a label on the front to help with product identification. In addition to the product identification markings, modules also contain markings for internal Bridgelux manufacturing use only. The image below shows which markings are for customer use and which ones are for Bridgelux internal use only. The Bridgelux internal manufacturing markings are subject to change without notice, however these will not impact the form, function or performance of the module.

Design Resources

Application Notes

Bridgelux has developed a comprehensive set of application notes and design resources to assist customers in successfully designing with the EB Series product family. For a list of resources under development, visit www.bridgelux.com.

Optical Source Models

Optical source models and ray set files are available for all Bridgelux products. For a list of available formats, visit www.bridgelux.com.

3D CAD Models

Three dimensional CAD models depicting the product outline of all Bridgelux EB Series LED linears are available in both IGES and STEP formats. Please contact your Bridgelux sales representative for assistance.

Precautions

CAUTION: CHEMICAL EXPOSURE HAZARD

Exposure to some chemicals commonly used in luminaire manufacturing and assembly can cause damage to the LED linear. Please consult Bridgelux Application Note for additional information.

CAUTION: EYE SAFETY

Eye safety classification for the use of Bridgelux EB Series is in accordance with IEC/TR62778: Application of IEC 62471 for the assessment of blue light hazard to light sources and luminaires. EB Series linears are classified as Risk Group 1 when operated at or below the maximum drive current. Please use appropriate precautions. It is important that employees working with LEDs are trained to use them safely.

CAUTION: RISK OF BURN

Do not touch the EB Series modules during operation. Allow the linear to cool for a sufficient period of time before handling. The EB Series linears may reach elevated temperatures such that could burn skin when touched.

CAUTION

CONTACT WITH LIGHT EMITTING SURFACE (LES)

Avoid any contact with the LES. Do not touch the LES of the linear or apply stress to the LES (yellow phosphor resin area). Contact may cause damage to the linear.

Optics and reflectors must not be mounted in contact with the LES (yellow phosphor resin area). Optical devices may be mounted on the top surface of the EB Series linear. Use the mechanical features of the linear housing, edges and/or mounting holes to locate and secure optical devices as needed.

Disclaimers

STANDARD TEST CONDITIONS

Unless otherwise stated, linear testing is performed at the nominal drive current.

MINOR PRODUCT CHANGE POLICY

The rigorous qualification testing on products offered by Bridgelux provides performance assurance. Slight cosmetic changes that do not affect form, fit, or function may occur as Bridgelux continues product optimization.

About Bridgelux: Bridging Light and Life™

At Bridgelux, we help companies, industries and people experience the power and possibility of light. Since 2002, we've designed LED solutions that are high performing, energy efficient, cost effective and easy to integrate. Our focus is on light's impact on human behavior, delivering products that create better environments, experiences and returns—both experiential and financial. And our patented technology drives new platforms for commercial and industrial luminaires.
