Flux Cleaning -

- (1) For the solvent, use water or alcohol. In addition, pay careful attention to use the solvent.
- (2) The cleaning method is limited to immersion cleaning only. The cleaning time is 2 minutes, max, but be sure to minimize the time as much as possible.
- (3) To clean the switch after soldering, wait until the switch temperature has cooled down to room temperature (30°C or below).
- (4) The product must be dried sufficiently after cleaning. Improper drying may result in fluctuation in torque or electrical damage.
