

(for DA2-Type only)(for DA-Type only)

Features

- Constant Current mode output with multiple levels selectable by dip switch
- Emergency lighting application is available according to IEC61347-2-13
- Built-in active PFC function and class II design
- Standby power consumption <0.5W
- Functions: DALI interface(logarithm or linear dimming curve selectable), push dimming synchronization up to 10units

Applications

- LED indoor lighting
- LED office lighting
- LED commercial lighting
- LED panel lighting
- Industrial lighting

Description

LCM-40DA series is a 40W AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch and the DALI interface with the compliance to IEC62386. LCM-40DA operates from 180~295VAC and offers different current levels ranging between 350mA and 1050mA. Thanks to the high efficiency up to 91%, with the fanless design, the entire series is able to operate for $-30^{\circ}C \rightarrow +90^{\circ}C$ case temperature under free air convection. In addition, LCM-40DA is equipped with push dimming and synchronization functions, so as to provide the optimal design flexibility for LED lighting system.

| Туре | Function | Note |
|-------|---|------------|
| Blank | standby power consumption <0.5W | In Stock |
| AUX | standby power consumption <1.2W and Auxiliary DC output(12V/50mA) | By request |

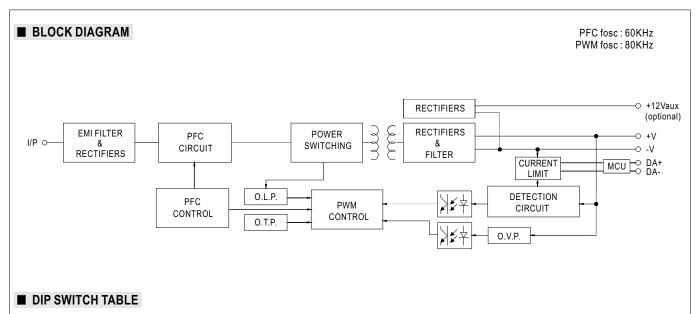

SPECIFICATION

MODEL LCM-40 -Current level selectable via DIP switch, please refer to"DIP SWITCH TABLE" section CURRENT LEVEL 500mA 600mA 900mA 1050mA 350mA 700mA(default) RATED POWER 42W DC VOLTAGE RANGE 2~100V 2~80V 2~67V 2~57V 2~45V 2~40V OUTPUT **OPEN CIRCUIT VOLTAGE (max.)** 110V 65V CURRENT RIPPLE 5.0% max. @rated current Note.5 CURRENT TOLERANCE $\pm 5\%$ AUXILIARY DC OUTPUT Nominal 12V(deviation 11.4~12.6V)@50mA for AUX-Type only Note.3 Note.9 SETUP TIME 500ms / 230VAC 180~295VAC 254 ~ 392VDC VOLTAGE RANGE Note.2 (Please refer to "STATIC CHARACTERISTIC" section) FREQUENCY RANGE 47~63Hz $PF \ge 0.975/230VAC$, $PF \ge 0.95/277VAC@$ full load POWER FACTOR (Typ.) Telcordia SR-332 (Bellcore) ; 193.7K hrs min. MIL-HDBK-217F (25°C) DIMENSION 123.5*81.5*23mm (L*W*H) OTHERS PACKING 0.24Kg; 54pcs/15Kg/1.12CUFT 1. All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25°C of ambient temperature. NOTE 2. De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details. 3. Length of set up time is measured at first cold start. Turning ON/OFF the driver may lead to increase of the set up time. 4. Efficiency is measured at 500mA/80V output set by DIP switch. Current ripple is measured 50%~100% of maximum voltage under rated power delivery. 6. Standby power consumption is measured at 180~230VAC. 7. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again. 8. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft). 9. Based on IEC 62386-101/102 DALI power on timing and interruption regulations, the set up time needs to test with a DALI controller which can support for DALI power on function, otherwise the set up time will be higher than 0.5 second for DA2-type. 10. To fulfill requirements of the latest ErP regulation for lighting fixtures, this LED power supply can only be used behind a switch without permanently connected to the mains. ※ Product Liability Disclaimer : For detailed information, please refer to https://www.meanwell.com/serviceDisclaimer.aspx

40W Multiple-Stage Constant Current Mode LED Driver

LCM-40DA series

LCM-40DA/DA2 is a multiple-stage constant current driver, selection of output current through DIP switch is exhibited below.

| DIP S.W. | 1 | 2 | 3 | 4 | 5 | 6 |
|------------------------|----|----|----|----|----|----|
| 350mA | | | | | | |
| 500mA | ON | | | | | |
| 600mA | ON | ON | | | | |
| 700mA(factory default) | ON | ON | ON | | | ON |
| 900mA | ON | ON | ON | ON | | ON |
| 1050mA | ON | ON | ON | ON | ON | ON |

Note: For more current setting, please contact MW's sales.

LCM-40DA series

DIMMING OPERATION

℁PUSH dimming(primary side)

| Action | Action duration | Function |
|------------|-----------------|---|
| Short push | 0.1~1 sec. | Turn ON-OFF the driver |
| Long push | 1.5~10 sec. | Every Long Push changes the dimming direction, dimming up or down |
| Reset | >11 sec. | Set up the dimming level to 100% |

• The factory default dimming level is at 100%.

• If the push action lasts less than 0.05 sec., it will not lead to a change for the status of the driver.

• Up to 10 drivers can perform the PUSH dimming at the same time when utilizing one common push button.

• The maximum length of the cable from the push button to the last driver is 20 meters.

• The additive push button can be connected only between the PUSH terminal, as displayed in the diagram, and AC/L (in brown or black); it will lead to short circuit if it is connected to AC/N.

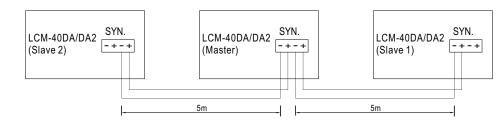

※DALI interface(primary side; for DA/DA2-Type)

- · Apply DALI signal between DA+ and DA-
- DALI protocol comprises 16 groups and 64 addresses.
- · First step is fixed at 6% of output.

SYNCHRONIZATION OPERATION

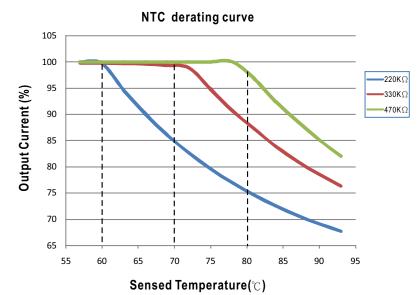

- Synchronization up to 10 drivers (1 master + 9 slaves)
- Dimming operating range : 10%~100%
- Sync cable length : < 5m
- Sync cable type : Flat cable
- Sync cable cross section area : 22 24 AWG (0.2~0.3mm²)

NOTE: 1. Please make sure all units are set to 100% dimming setting (factory default) before synchronizing. 2. Min. Dimming operating range depends on dimmer setting.

■ TEMPERATURE COMPENSATION OPERATION

LCM-40DA/DA2 have the built-in temperature compensation function; by connecting a temperature sensor (NTC resistor) between the +NTC / -NTC terminal of LCM-40DA/DA2 and the detecting point on the lighting system or the surrounding environment, output current of LCM-40DA/DA2 could be correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

© LCM-40DA/DA2 can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the DIP switch.

NTC reference:

| NTC resistance | Output Current |
|----------------|---|
| 220K | < 60° C, 100% of the rated current (corresponds to the setting current level) > 60° C, output current begins to reduce, please refer to the curve for details. |
| 330K | < 70 $^{\circ}$ C, 100% of the rated current (corresponds to the setting current level) > 70 $^{\circ}$ C, output current begins to reduce, please refer to the curve for details. |
| 470K | < 80°C, 100% of the rated current (corresponds to the setting current level) > 80°C, output current begins to reduce, please refer to the curve for details. |

 $Notes: 1. MEAN \ WELL \ does \ not \ offer \ the \ NTC \ resistor \ and \ all \ the \ data \ above \ are \ measured \ by \ using \ THINKING \ TTC03 \ series.$

2. If other brands of NTC resistor is applied, please check the temperature curve first.

O Dimming and synchronization function of the driver will be invalid when the "temperature compensation" function is in use.
