

## ANT-AF04505 High Gain RF Antenna

This 433MHz antenna is manufactured with high standard quality control and ensures stable maximum signal gain of 5.0dBi to help you to receive a strong RF signal. The antenna comes with a magnetic base with a 1.5-meter cable. A ready-to-use SMA connector made of high quality brass is convenient for installation and plug-and-play.

### Specifications:

Material: ABS + Metal  
Color: Black  
Base: Magnetic  
Frequency: 433MHz  
Band Width: 50MHz  
Input Impedance: 50Ω  
VSWR: ≤1.5  
Gain: 5dBi  
Power Capacity: 50W  
Polarization Form: Vertical  
Lightning Protection: DC Ground  
Operating Temperature: -40~60°C  
Connector Type: SMA  
Height: 210 mm  
Base Diameter: 65 mm  
Cable Length: 1.5 meter  
Used On: A150 Gateway/Controller
